Economics As Discourse:

Economics As Discourse Warren J. Samuels, 2013-04-17 1 Warren J Samuels The study of economics as discourse requires a perspective that focuses on the relationships among knowledge or truth discourse or language and meaning Central to this task is the recognition that the conduct of economic analysis uses words and that words embody meanings that are applied to the object of study but do not necessarily derive from that object although they define that object for us Knowledge Economists are engaged in efforts to understand and explain the economy In the pursuit of this knowledge they have attempted to make coherent the respects in which belief is to be accepted as knowledge or the senses in which this knowledge has the quality of truth The field of methodology in economics parallels the fields of epistemology and philosophy of science in the attempt to make sense of and to prescribe the terms on which efforts at knowledge may be accepted as true or the terms on which statements can be accepted as knowledge The conduct of such methodological inquiry typically treats economics as a science 1 2 ECONOMICS AS DISCOURSE engaged in the pursuit of truth as an epistemological category though there have almost always been economists who were skeptical of the status of economics as a science and the pursuit of knowledge is only one of three putative functions of economics the other two being psychic balm and social control *The Language of Economics* Willie Henderson, Tony Dudley-Evans, 1990 This volume draws together various strands of research and teaching related to language and economics The key paper is that of Professor McCloskey an economist who has criticized the evidence of economics writing in his book *The Rhetoric of Economics* **Strategies of Economic Order** Keith Tribe, 2007-04-19 This book provides an overview of two hundred years of German economic thought from the Staatswissenschaften of the eighteenth century to National Socialism and the Social Market Whereas classical economics from Smith through Ricardo to Marx and Mill emphasised value distribution and production German economic thought had a long running tradition of human need and the varying conditions for order These ideas are brought together by a conception of rational action and therefore a rationalistic appraisal of welfare and order By taking this perspective the usual contrast of market and planning approaches to economic organisation is subsumed by an approach which focuses on the construction of order in economic processes This book highlights the continuity of this practical approach of German economists through the two centuries under consideration from the Cameralists to the Ordoliberals Discourse Analysis and Austerity Kate Power, Tanweer Ali, Eva Lebedušková, 2019-03-04 In the immediate aftermath of the global financial crisis of 2008 governments around the developed world coordinated policy moves to stimulate economic activity and avert a depression In subsequent years however cuts to public expenditure or austerity have become the dominant narrative in public debate on economic policy This unique collaboration between economists and linguists examines manifestations of the discourses of austerity as these have played out in media policy and academic settings across Europe and the Americas Adopting a critical perspective it seeks to elucidate the discursive and argumentation strategies used to consolidate austerity as the dominant economic

policy narrative of the twenty first century **Governing Economy** Keith Tribe,1988-08-26 *Land, Labour, and Economic Discourse* Keith Tribe,1978 *Essays on the Methodology and Discourse of Economics* Warren J. Samuels,2014-01-14 Contains a collection of articles on economics as a system of discourse and on certain epistemological problems of economics The treatment of both topics centres on the role of often implicit assumptions as to whose interests count in reaching conclusions especially as to policy *Dialogue within Discourse Communities* Julia Bamford,Marina Bondi,2011-12-07 The book explores aspects of reflexivity and interactivity in a variety of academic genres oral and written scientific and educational Academic discourse is explored from a variety of perspectives that take a dialogic view of language use as their starting point ranging from conversation analysis to descriptive or applied genre studies Particular attention is paid to the way metadiscursive expressions contribute to a representation of the communicative procedures that characterise the ongoing scientific and educational dialogues **Economic Thought and Discourse in the 20th Century** Warren J. Samuels,Jeff Biddle,Thomas W. Patchak-Schuster,1993 This work on the history of economics deals with three major figures Hicks Veblen and Marshall It describes Hicks theoretical stance on the functions of the history of economic thought Veblen s work on war and peace and the discursive structure of Marshall s work Economics **On the Question of Free Trade** James D. Miller,Vox Day,2016-12-04 For more than 200 years the question of free trade has been considered settled by economists However advancements in technology have considerably changed the world since David Ricardo popularized the concept of Comparative Advantage in the early 19th century and the rise of economic populism around the world is increasingly calling long held assumptions into question On the Question of Free Trade is a public debate between Dr James D Miller Associate Professor of Economics at Smith College and Vox Day the author of The Return of the Great Depression in which they address the vital question of whether free trade is intrinsically beneficial or detrimental to a national economy Both participants are well versed in economic history and economic theory which permits them to bypass the political side issues that so often cloud such debates and focus on the core issues involved The post debate Q A session is also included On the Question of Free Trade is an informative and thought provoking discourse that will provide material for serious contemplation regardless of the reader s perspective on economics and free trade *Language, Communication and the Economy* Guido Erreygers,Geert Jacobs,2005-11-24 This volume brings together a number of wide ranging transdisciplinary research articles on the interface between discourse studies and economics It explores in what way economics can contribute to the analysis of discursive practices in various institutional settings as well as investigating what role discourse studies can play in economic research The contributors are linguists communication scholars economists and other social scientists drawing on various traditions including Critical Discourse Analysis Cognitive Linguistics ethnography and the literature on the rhetoric of economics and on economic storytelling All articles are essentially empirical focusing on the details of actual language use The type of data analysed ranges from the minutes of university policy meetings and large scale corpora of

newspaper language over books of economic theory from both well respected economists and monetary cranks to cartoons from The Economist *The Popularisation of Business and Economic English in Online Newspapers* Elisa Mattiello, 2014-08-11 This book investigates the evolution of economic discourse from fully specialised texts towards popularisation Popularising texts on economics and business related matters has hitherto been a neglected and under explored area of enquiry and yet it deserves attention and study on account of the new fascinating insights it offers into specialised language and discourse The present book explores this under researched area via the qualitative analysis of a modern genre namely newspapers on the web In particular it scrutinises authentic extracts principally drawn from The Guardian Online in order to show on the one hand the popularising effect of the Internet on business and economic discourse and on the other hand the realistic vocabulary currently used in economic and professional jargon The introductory chapter discusses the popularisation of specialised text at large and of new media discourse in particular It describes this phenomenon as a reformulation process whereby specialised knowledge is transformed into everyday or lay knowledge and also as a recontextualisation process whereby popularisation discourse is adapted to the appropriateness conditions of the new genres and to the constraints of the media employed Popularisation it is claimed implies relevant changes not only in terms of terminological simplifications and adaptations to the public's prior knowledge but also in terms of the roles undertaken by the participants in the communicative event The remaining chapters are organised into thematic units whose topics range from global economy economic growth and financial crisis to business management employment and sales This part provides an in depth investigation of various topics related to the economics and business worlds combined with systematic explanations of linguistic phenomena at various language levels from morphology to syntax semantics and the lexicon In this book the lexicon of ESP is offered in a fresh less formal style which will attract younger and non expert readers alongside experts and professionals The book is of considerable interest to students at undergraduate and postgraduate levels lecturers professors entrepreneurs specialists and to those scholars who investigate ESP and its popularisation *Explorations in Economic Methodology* Roger E. Backhouse, 2006-10-19 Roger Backhouse is a key figure in the field of economic methodology Explorations in Economic Methodology both clarifies and responds to the issues raised by the literature and argues that methodology is an essential activity Offering a constructive but critical response to the recent literature this collection provides important new insights for students and researchers in economic methodology and the philosophy of science **Economics as Rhetoric** Anne Isla, 2024-07-26 Bernard Maris was killed in Paris on January 7 2015 during the terrorist attack against the satirical magazine Charlie Hebdo He remains one of the most original intellectuals of contemporary France but despite being a uniquely original heterodox thinker his international reputation has been compromised by the fact that his writings are inaccessible to non French speakers This book remedies that By providing an overview of Bernard Maris life and intellectual trajectory as well as an English translation of an anthology of his most

relevant writings this volume provides the international audience for the first time ever the chance to know and understand the contribution of this major heterodox economist An outstanding and atypical figure in economic thought and a virulent critic of mainstream dominant economics he was also an all round actor and thinker of his time Through rigorous reasoning he questioned the notion of well being which he argued is too often conflated with having more Enslavement by work or the endless destructive accumulation of natural wealth is also inherent to the capitalist system Probably his most original contribution is his epistemological reflection on the very nature of economics and his appraisal of this discipline as a form of rhetoric This book will be of great interest to readers in heterodox economics economic methodology epistemology and French literature and culture more broadly

Economics and Language William Henderson, 2017-09-08 First published in 2003 Routledge is an imprint of Taylor Francis an informa company

Discipline in the Global Economy? Jakob Vestergaard, 2009-01-13 This book investigates the new mode of global economic governance Vestergaard argues that only by abandoning certain laissez faire tales about liberalism may we begin to understand our present condition and open a space for critical thought in the face of an ever more pervasive neoliberalism

Metaphor in Economics and Specialised Discourse Maurizio Gotti, José Mateo, Francisco Yus, 2021-09-30 This book approaches metaphor in specialised discourses covering various fields The studies presented in the book adopt different research frameworks ranging from pragmatics to conceptual metaphor theory among others The book is divided into three Sections that analyse major specialised discourses where metaphor is frequently found and the role that metaphor plays in these discourses The first Section approaches the discourse of Business and Economics from different perspectives The second Section addresses the use of metaphor in politics diplomacy and law Finally Section three covers the use of metaphors in other specialised discourses such as marine fashion gender or health

Economics and Hermeneutics Don Lavoie, 2005-07-28 Economics and Hermeneutics looks at the ways that hermeneutics might help economists address problems such as entrepreneurship price theory rational expectations monetary theory welfare economics and economic policy

Postcolonialism Meets Economics Eiman O. Zein-Elabdin, S. Charusheela, 2004 The wide array of contributions to this book draws on the rapidly growing body of post colonial studies to critique both orthodox and heterodox economics
