Economics Of The Postal System Alternatives And Reform:

The Economics of the Postal System Alan L. Sorkin,1980 **Economic Thought in Communist and Post-Communist Europe** Hans-Jurgen Wagener,1998-02-12 Written by leading east European scholars this book provides a wide ranging overview of fifty years of economic thinking under communist rule in Europe and during the first phase of post communist economic transformation **The Politics of Postal Transformation** Robert Malcolm Campbell,2002 The postal system is a multi billion dollar industry and one of the world s largest employers Until recently it has been controlled by government owned monopolies designed to provide universal postal service However in response to technological and international competition as well as public disenchantment with subsidies and inefficiencies governments have embraced a range of new strategies The Politics of Postal Transformation investigates the most important policy innovations that have been instituted to match domestic political expectations with international and technological realities Robert Campbell s comparative analysis provides recommendations for policy makers around the world and lays the foundation for informed speculation about the possible future domination of the system by a select group of postal behemoths Book jacket *Economic Institutions and Democratic Reform* Ole Nørgaard,2000-01-01 This book will be essential and challenging reading for political scientists and economists as well as policymakers in NGOs such as aid agencies and the institutions of the EU BOOK JACKET

H.R. 22, the Postal Reform Act of 1997 United States. Congress. House. Committee on Government Reform and Oversight. Subcommittee on the Postal Service,1997 **Alternative Political Economy Models of Transition** John Marangos,2017-07-05 The collapse of centrally administered socialism in Russia and Eastern Europe resulted in what is commonly referred to as the transition problem the transformation from a centrally administered socialist economic system to one that is market based Economic science has been faced with the challenge of developing an appropriate body of analysis advice and direction to help other nations that may be undergoing this process In this volume John Marangos adopts a political economy approach that yields alternative models of transition The volume develops transition models from what Marangos defines as the primary elements of six variables 1 economic analysis 2 definitions of the Good Society 3 speed of transition 4 political structure 5 ideological structure and 6 initial conditions The models developed include the shock therapy model the neoclassical gradualist model of transition the post Keynesian model the pluralistic market the socialist model and the non pluralistic market socialist model After identifying the primary elements of each transition model Marangos considers the elements of each model with respect to the desirable reforms An essential element of the transition process is not only to identify the necessary reforms but also a sequence in which the reforms should be introduced For each transition model developed in this book a set of primary and secondary elements were provided in conjunction with a sequence of reforms Analyzing the transition problem from a political economy perspective Marangos shows that it is possible to have inconsistencies within each transition model and between transition models yet be able to identify the

potential for implementation and maintenance of necessary reforms each model recommends This volume contributes to the understanding of the process of transition with the objective of identifying an optimal model of transition The Political Economy of Pension Policy Reversal in Post-Communist Countries Sarah Wilson Sokhey,2017-10-26 Why do governments backtrack on major policy reforms Reversals of pension privatization provide insight into why governments abandon potentially path departing policy changes Academics and policymakers will find this work relevant in understanding market oriented reform authoritarian and post communist politics and the politics of aging populations The clear presentation and multi method approach make the findings broadly accessible in understanding social security reform an issue of increasing importance around the world Survival analysis using global data is complemented by detailed case studies of reversal in Russia Hungary and Poland including original survey data The findings support an innovative argument countering the conventional wisdom that more extensive reforms are more likely to survive Indeed governments pursuing moderate reform neither the least nor most extensive reformers were the most likely to retract This lends insight into the stickiness of many social and economic reforms calling for more attention to which reforms are reversible and which as a result may ultimately be detrimental **Provincial Strategies of Economic Reform in Post-Mao China** Peter T.Y. Cheung,Jae Ho

Chung,Zhimin Lin,2016-12-05 Focusing on the role of provincial leadership in the initiation and implementation of economic reform this text studies economic decentralization in eight Chinese provinces In each area resource allocation and acquisition of foreign capital and investment are investigated **Treasury, Postal Service, and general government**

appropriations for fiscal year 1988 United States. Congress. House. Committee on Appropriations. Subcommittee on the Treasury, Postal Service, and General Government Appropriations,1987 **Treasury, Postal Service, and General Government Appropriations for Fiscal Year 1988: Department of the Treasury** United States. Congress. House. Committee on Appropriations. Subcommittee on the Treasury, Postal Service, and General Government Appropriations,1987

World Economic Outlook, April 2016 International Monetary Fund. Research Dept., 2016-04-12 Major macroeconomic realignments are affecting prospects differentially across the world s countries and regions The April 2016 WEO examines the causes and implications of these realignments including the slowdown and rebalancing in China a further decline in commodity prices a related slowdown in investment and trade and declining capital flows to emerging market and developing economies which are generating substantial uncertainty and affecting the outlook for the global economy Additionally analytical chapters examine the slowdown in capital flows to emerging market economies since their 2010 peak its main characteristics how it compares with past slowdowns the factors that are driving it and whether exchange rate flexibility has changed the dynamics of the capital inflow cycle and assess whether product and labor market reforms can improve the economic outlook in advanced economies looking at the recent evolution and scope for further reform the channels through which reforms affect economic activity under strong versus weak economic conditions reforms short to medium term macroeconomic effects and sequencing of reforms and coordination with other policies to maximize their potential quantitative economic benefits A special feature analyzes in depth the energy transition in an era of low fossil fuel prices

Congressional Record United States. Congress, 1995 **Economic Transition and Political Legitimacy in Post-Mao China** Feng Chen, Feng Ch?en, 1995-01-01 Tracing the role of ideas in Chinese economic reform from 1978 to the present this book explores the conversion of China s policymakers to capitalist economic thinking Chen argues that the reform process has created a gap between the legitimacy of the leadership which remains rooted in Marxist Leninist ideology and the practice of reform which has abandoned such ideological constraints Through a systematic survey of party documents and resolutions official publications leaders speeches academic journals and newspapers Chen shows how Chinese policymakers reconceptualized the ownership system and adjusted related policies Focusing on a number of

economic policy issue areas such as state economy rural reform privatization and income distribution he analyzes in depth the implications of this gap for the current Chinese leadership and the future of China's political development

Structural Reforms Without Prejudices Tito Boeri, Giorgio Barba Navaretti, 2006-06-15 Our economies face constant challenges from many different directions Structural reforms are implemented every day either to grasp the benefits of globalization and technological change or to avoid foundering on unaffordable welfare systems or the rise of new economies Despite this flurry of reforms many of their effects are insufficiently understood What makes reforms a success or a failure Why do we witness systematically ambivalent attitudes to reforms Can governments implement reforms differently without inflicting prejudice to large fringes of the population This book explores these issues by comparing a number of reforms across a large set of countries and sectors First through an innovative multisectorial input output analysis the authors compare the effects of liberalisation reforms in the telecommunication and electricity sectors across Europe Surprisingly they find that very similar and well intended reforms can generate highly contrasted outcomes It is also shown that governments must consider the effects of each reform on all sectors of the economy Second the authors explore how governments can tailor their reform strategy to alter the redistributive effects of reforms They show that the government's approach to reforms has been very different across time and across countries A government's approach depends on local institutions on the nature of the opposition and on the scope of the reform under way The authors however show that governments do have alternatives Often there are ways to tailor reforms so as to protect specific parts of the population and there are ways to experiment gradually to avoid costly policy mistakes
