Economies In Transition Comparing Asia:

Economies in Transition Wing Thye Woo, Stephen Parker, Jeffrey Sachs, 1997 In 1994 the Asia Foundation's Center for Asian Pacific Affairs began a two year project to compare the transitions of selected East European and Asian economies from centrally planned communist systems to market economies The goal was to shed light on the transition process through an understanding of the underlying economic and institutional dynamics This volume is the culmination of that project The volume is divided into three parts In the first part an overview the editors review the authors findings and highlight major themes The second part looks closely at the transition process in seven Asian and East European economies China Vietnam Mongolia Russia Poland Hungary and the Czech Republic The third part contains six comparative studies that explore key elements of the transition process The papers incorporate feedback obtained from meetings with cabinet members and high government officials conferences and seminars in Prague Ho Chi Minh City Hanoi Beijing Ulan Bator and Washington D C Contributors Leszek Balcerowicz Barbara Blaszczyk Peter Boone Yuan Zheng Cao Bruce Comer Marek Dabrowski Georges de Menil Daniel C Esty Gang Fan Boris Federov Roman Frydman Carol Graham Stephen Parker Andrzej Rapaczynski James Riedel Jeffrey D Sachs Baavaa Tarvaa Vinod Thomas Gavin Tritt Adiya Tsend Enkhbold Tsendjav Joel Turkewitz Narantsetseg Unenburen Yan Wang Wing Thye Woo *The Rise of Asia* Prema-chandra Athukorala, 2010-07-12 The Rise of Asia examines emerging trends and patterns of foreign trade and investment in Asia with a view to contributing to the policy debate on how development strategies should be adopted in response to challenges to economic globalization The existing body of knowledge in this subject area has predominantly been shaped by the experiences of the newly industrialized countries NICs in East Asia This volume is inspired by the conviction that generalization from the NIC experience is hazardous because the on going process of economic globalization over the past two decades has dramatically transformed the international context of national development policy making Moreover as embracing market albeit at varying degree and rapidly has now become an Asia wide phenomenon it is vital to look at the issues from a broader relational perspective paying attention to opportunities for intra regional division of labour within the wider context of global economic integration This book will be of interest to students and scholars with an interest in Asian studies economics political economy and globalization

Alternative Political Economy Models of Transition John Marangos,2017-07-05 The collapse of centrally administered

socialism in Russia and Eastern Europe resulted in what is commonly referred to as the transition problem the transformation from a centrally administered socialist economic system to one that is market based Economic science has been faced with the challenge of developing an appropriate body of analysis advice and direction to help other nations that may be undergoing this process In this volume John Marangos adopts a political economy approach that yields alternative models of transition The volume develops transition models from what Marangos defines as the primary elements of six variables 1 economic analysis 2 definitions of the Good Society 3 speed of transition 4 political structure 5 ideological structure and 6 initial conditions The models developed include the shock therapy model the neoclassical gradualist model of transition the post Keynesian model the pluralistic market the socialist model and the non pluralistic market socialist model After identifying the primary elements of each transition model Marangos considers the elements of each model with respect to the desirable reforms An essential element of the transition process is not only to identify the necessary reforms but also a sequence in which the reforms should be introduced For each transition model developed in this book a set of primary and secondary elements were provided in conjunction with a sequence of reforms Analyzing the transition problem from a political economy perspective Marangos shows that it is possible to have inconsistencies within each transition model and between transition models yet be able to identify the potential for implementation and maintenance of necessary reforms each model recommends This volume contributes to the understanding of the process of transition with the objective of identifying an optimal model of transition **The Informal Economy in the EU Accession Countries** Boyan Belev,2003
