Eldoret Richard M. Swiderski, 1995 Eldoret An African Poetics of Technology is both a history and an anthropology of technology As author Swiderski explains in the introduction Poetics derived from the Greek verb poein meaning to make do has as much to do with technology material making as with poetry verbal making and refers to the ongoing act of assembly that can look like the passage of time or the eternity of culture and is actually both It is an African poetics because the act of assembly is motivated by African conditions and executed through the genius and strength of the African people The resulting ethnography illustrated with thirty two of the author's delightful line drawings is unconventional in design and brilliantly executed It will be of considerable interest and value not only to cultural anthropologists but to many in geography economics business technology studies and allied fields Drawing on his personal experience in living in Eldoret Swiderski creates an impressionistic sketch of the hybridization of imported and indigenous technologies in this community and of the varied patterns that are created as the residents of the town and its hinterland employ these technologies in everyday life The poetic focus on technology is a creative and effective device for exploring many wider issues entrepreneurship resource management wealth poverty structural unemployment gender relations ethnic and class conflict and other problems of life and development in Third World communities

popular culture beginning in the early eighteenth century when Dr Thomas Dover nicknamed Dr Quicksilver began prescribing doses of raw mercury to clear out intestinal blockages and rid the body of syphilis and other diseases The author then details the role of mercury in several medical industrial and cultural applications In the fields of dentistry and vaccination mercury continues to be used as a preservative and amalgamative agent In the cosmetics industry mercury was once used as a popular skin lightener in soaps and skin creams In the early development of obstetrics and gynecology mercury was once used to stimulate conception and fetal abortion Many more uses of mercury along with many more are outlined in the work while several appendices provide translations of rare works which reference mercury **Technology**
