Semiconductor Microdevices and Materials David H. Navon, 1986 This text is an accurate concise introduction to semiconductor materials IC device design and IC chip fabrication processes Students will benefit from the brief introduction to the fundamentals of semiconductor materials which emphasizes for example the advantages of using GaAs instead of Si for the fabrication of certain devices Navon explains how to use computer modeling in analysis and design and provides numerous practical relevant worked problems to reinforce the material Microelectronic Circuits Adel S. Sedra, Kenneth Carless Smith.1982 Monographic Series Library of Congress, 1982 **Fundamentals of Electrical Engineering** Leonard S. Bobrow,1985 For the first course in electrical engineering this text is more than just a survey of the basics of electrical engineering Even at this introductory level Bobrow covers most of the material in sufficient detail for students to gain a good understanding of the fundamental principles on which modern electrical engineering is based. The text is partitioned into four parts circuits electronics digital systems and electromechanics The circuits portion includes the traditional circuits topics such as Ohm s law Kirchhoff's laws resistive analysis techniques various circuit theorems and principles time domain and frequency domain analysis procedures power three phase circuits resonance frequency response and elementary system concepts The electronics portion deals with both theory and applications of the major semiconductor devices diodes and transistors in both discrete and integrated circuit IC form In the digital systems portion basic digital logic elements and logic design in both discrete and IC forms are covered Sequential as well as combinational logic is covered The electromechanics portion covers topics such as magnetic circuits magnetic induction and transformers on an elementary level Each chapter ends with a problem set with selected answers available at the back of the book Mathematical Methods in Continuous and Discrete Systems Shlomo Karni, William J.
