Biochemistry of Membrane Transport G. Semenza, E. Carafoli, 2012-12-06 This volume contains the proceedings of the FEBS Symposium on the Biochemistry of Membrane Transport which was held at the Swiss Institute of Technology Zurich July 18-23 1976 Of the speakers invited or originally only five could not attend the meeting and of the lectures given all but one of the texts are published here Thus this volume gives a faithful account of the way the meeting was originally conceived and actually took place This Symposium on Biochemistry of Membrane Transport was the first Symposium sponsored by the FEBS outside the yearly FEBS Meetings after the Special Meeting on Industrial Biochemistry which took place in Dublin in 1973 and it reflects the interest and the trend for gatherings of smaller size than the official FEBS Meetings The topic of the Symposium was an easy choice not only because membrane transport is becoming more and more important to biochemistry every year but also because of the long standing interest of Swiss Science in the field In the choice of the topics and of the speakers efforts were made to achieve as balanced a coverage of the area as possible However since some aspects of membrane biochemistry were dealt with extensively at the parallel 10th International Congress of Biochemistry in Hamburg certain topics were given less emphasis than others The Symposium was attended by about 400 participants we expected 200-250 among them 48 were invited speakers and some 200 contributed posters Química bioinorgánica Ei-ichiro Ochiai, 2023-02-27 Este libro intenta servir de introducción en este nuevo campo a estudiantes de niveles avanzados y a graduados Pretende servir al químico inorgánico que quiera orientar su investigación por este campo así como a los bioquímicos interesados en un resumen del trabajo existente El libro se divide en dos partes En la Parte 1 se da una visión de conjunto del material fundamental importante y se introduce por lo general al lector en las cuestiones del tema de la obra La Parte 2 es la fundamental del libro y trata de la mayor parte de los elementos inorgánicos de importancia Energy, Regulation, and Biosynthesis in Molecular Biology Dietman Richter, 1974 Symposium held June 12th 1974 in honor of F Lipmann
