Electron And Ion Swarms:

Swarms of Ions and Electrons in Gases W. Lindinger, T.D. Märk, F. Howorka, 2012-12-06 Our understanding of elementary processes in plasmas has been increasing dramatically over the last few years The development of various swarm techniques such as the temperature variable selected ion flow tube or the selected ion flow drift tube has provided the prerequisite for detailed investigations into ion molecule reactions both in binary and three body collisions and the mechanisms of many reactions are now understood quite satisfactorily This information could not have been obtained without a detailed knowledge of the transport phenomena involved Some of these such as the internal energy distribution of drifting ions have only very recently been tackled both theoretically and experimentally a consistent model is now being developed As the interactions between the various branches of swarm research have become more and more intense the most obvious thing to do was putting together a review on the present state of this subject which is the aim of this book **Proceedings**

of the 8th International Seminar on Electron and Ion Swarms Tore H. Løvåas, Helge R. Skullerud, 1994 **Swarm Studies and Inelastic Electron-Molecule Collisions** Leanne C. Pitchford, B. Vincent McKoy, Ara Chutjian, Sandar Trajmar, 2012-12-06 This volume presents the contributions of participants in the Symposium on Swarm Studies and Inelastic Electron Molecule Collisions held on July 19-23 1985 in Tahoe City California This was a joint meeting of the Fourth International Swarm Seminar and the Electron Molecule Collisions Symposium which have been traditionally separate satellite symposia to the International Conference on the Physics of Electronic and Atomic Collisions ICPEAC In the early stages of planning for these two satellite symposia to the XIVth ICPEAC a group of us recognized the significant scientific merit and advantages of having a joint symposium This idea was particularly appealing due to a large mutual interest in important advances theoretical experimental and modeling in both fields and because it provides a forum to bring together a single collision point of view with a multiple collision one For example studies of multiple term solutions to Boltzmann's equation and their application to swarm systems are intrinsically coupled to the availability of both integral and differential cross sections for electron molecule collisions In turn experimental and theoretical studies of these electron molecule scattering cross sections are becoming quite sophisticated accurate and comprehensive Furthermore in swarm studies computational and experimental methods have advanced to the point where detailed and meaningful comparison with and use of single collision beam data is now possible More over recent experimental advances in the study of single collision electron attachment phenomena have provided a significant overlap with swarm data and extension to subthermal energies

Gaseous Ion Mobility, Diffusion, and Reaction Larry A. Viehland, 2018-12-19 This book is about the drift diffusion and reaction of ions moving through gases under the influence of an external electric field the gas temperature and the number

density While this field was established late in the 19th century experimental and theoretical studies of ion and electron swarms continue to be important in such varied fields as atomic and molecular physics aeronomy and atmospheric chemistry gaseous electronics plasma processing and laser physics This book follows in the rigorous tradition of well known older books on the subject while at the same time providing a much needed overview of modern developments with a focus on theory Graduate students and researchers new to this field will find this book an indispensable guide particularly those involved with ion mobility spectrometry and the use of ion transport coefficients to test and improve ab initio ion neutral interaction potentials Established researchers and academics will find in this book a modern companion to the classic references
