Song, 1996 Principles and Applications of ESR Spectroscopy Anders Lund, Masaru Shiotani, Shigetaka Shimada, 2011-01-04 Principles and Applications of ESR Spectroscopy fills the gap between the detailed monographs in ESR spectroscopy and the general textbooks in molecular physics physical chemistry biochemistry or spectroscopy The latter only briefly explain the underlying theory and do not provide details about applications while the currently available ESR textbooks are primarily focused on the technique as such This text is based upon the authors long experience of teaching the subject to a mixed audience in the extreme case ranging from physics to biology The potential of the method is illustrated with applications in fields such as molecular science catalysis and environmental sciences polymer and materials sciences biochemistry and radiation chemistry physics Theoretical derivations have in general been omitted as they have been presented repeatedly in previous works The necessary theory is instead illustrated by practical examples from the literature

Biomedical EPR - Part A: Free Radicals, Metals, Medicine and Physiology Sandra S. Eaton, Gareth R. Eaton, Lawrence J. Berliner, 2006-01-20 Biomedical EPR Part A focuses on applications of EPR spectroscopy in the areas of free radicals metals medicine and physiology The book celebrates the 70th birthday of Prof James S Hyde Medical College of Wisconsin and his contributions to this field Chapters are written to provide introductory material for new comers to the field which lead into up to date reviews that provide perspective on the wide range of questions that can be addressed by EPR Key Features Free Radicals in Medicine Radicals in vivo and in Model Systems and their Study by Spin Trapping In vivo EPR including Oximetry and Imaging Time Domain EPR at Radio Frequencies EPR of Copper Complexes Motion and Frequency Dependence Time Domain EPR and Electron Spin Echo Envelope Modulation Assessing the Functional Structure of Molecular Transporters by EPR Spectroscopy Matthias J.N. Junk, 2012-01-05 In his thesis Matthias Junk takes an innovative approach to assess the local structure and dynamics of biological and synthetic amphiphilic macromolecules capable of transporting small molecules Replacing the latter with stable radicals he uses state of the art electron paramagnetic resonance EPR spectroscopy to describe the highly relevant transport function from the viewpoint of the guest molecules Such he demonstrates that the

functional structure of human serum albumin in solution significantly differs from its crystal structure a consequence of the protein's adaptability to host various endogenous compounds and drug molecules Further he shows that the thermal collapse of thermoresponsive hydrogels and dendronized polymers leads to static and dynamic heterogeneities on the nanoscale These heterogeneities bear consequences for the material's hosting properties and enable unforeseen complex catalytic functionalities
