Ecology In Ancient Civilizations:

Ecology in Ancient Civilizations Johnson Donald Hughes, 1975 Intended to serve as an introduction to the environmental history of the ancient world from preface Environmental Problems of the Greeks and Romans J. Donald Hughes, 2014-02-15 How did ancient societies change the environment and how do their actions continue to affect us today In this dramatically revised and expanded second edition of the work entitled *Pan s Travail* J Donald Hughes examines the environmental history of the classical period and argues that the decline of ancient civilizations resulted in part from their exploitation of the natural world Focusing on Greece and Rome as well as areas subject to their influences Hughes offers a detailed look at the impact of humans and their technologies on the ecology of the Mediterranean basin Evidence of deforestation in ancient Greece the remains of Roman aqueducts and mines and paintings on centuries old pottery that depict agricultural activities document ancient actions that resulted in detrimental consequences to the environment Hughes compares the ancient world s environmental problems to other persistent social problems and discusses attitudes toward nature expressed in Greek and Latin literature In addition to extensive revisions based on the latest research this new edition includes photographs from Hughes s worldwide excursions a new chapter on warfare and the environment and an updated bibliography The Ancient Mediterranean Environment between Science and History William V. Harris, 2013-07-25 Scientists historians and archaeologists are at last beginning to collaborate seriously on studies of the long term history of the environment The fruit of an international conference held in Rome in 2011 *The Ancient Mediterranean Environment between Science and History* brings together scientists and scholars who are interested in the interaction of their several disciplines as well as in specific problems such as the effects of climate change and other environmental factors on historical developments and events the sources of the energy and fuel used in ancient civilizations and the effects of humans on the lands around the Mediterranean The collection balances broad Mediterranean wide studies and tightly focused studies of particular regions in Italy and Jordan *Ecology in ancient civilizations* J. Donald Hughes, 1975 **Ecocriticism, Ecology, and the Cultures of Antiquity** Christopher Schliephake, 2016-12-07 Although current environmental debates lay the focus on the Industrial Revolution as a sociopolitical development that has led to the current environmental crisis many ecocritical projects have avoided historicizing their concepts or have been characterized by approaches that were either pre historic or post historic while the environmental movement has harbored the dream of restoring nature to a state untouched by human hands there is also the pessimistic vision of a post apocalyptic world exhausted by humanity s consumption of natural resources Against this background the decline of nature has become a narrative template quite common among the public environmental discourse and environmental scientists alike The volume revisits Antiquity as an epoch which witnessed similar environmental problems and came up with its own interpretations and solutions in dealing with them This decidedly historical perspective is not only supposed to fill in a blank in ecocritical discourse but also to question problematize and

inform our contemporary debates with a completely different take on nature and humanity's place in the world. Thereby a productive dialogue between contemporary ecocritical theories and the classical tradition is established that highlights similarities as well as differences. This volume is the first book to bring ecocriticism and the classical tradition into a comprehensive dialogue. It assembles recognized experts in the field and advanced scholars as well as young and aspiring ecocritics. In order to ensure a dialogic exchange between the contributions, the volume includes four response essays by established ecocritics which embed the sections within a larger theoretical and practical ecocritical framework and discuss the potential of including the pre-modern world into our environmental debates.

Ecology and the World-System Walter L. Goldfrank, David Goodman, Andrew Szasz, 1999-06-30 Integrating environmental and world systems analyses in chapters ranging from the ancient to the contemporary from the global to the local from West to East and from North to South, this book is the first collection to analyze environmental issues from the world systems perspective. The introduction provides Immanuel Wallerstein's fullest explication of the role of ecological constraints in the world system. Early chapters diagnose the increasing environmental threats to global sustainability and suggest ways to arrive at an integrated theoretical understanding of those threats. The work then shows the historical and geographical range necessary to do justice to ecological considerations in chapters considering ancient civilizations, capitalism, the circumpolar North, the dam builders of Asia, and the polluters of East Central Europe. The final chapters analyze the successes and limits of environmental movements in the United States, South Africa, and South Korea.

The Environmental Humanities and the Ancient World Christopher Schliephake, 2020-07-23 What can a study of antiquity contribute to the interdisciplinary paradigm of the environmental humanities? And how does this recent paradigm influence the way we perceive human-nature interactions in pre-modernity? By asking these and a number of related questions, this Element aims to show why the ancient tradition still matters in the Anthropocene. Offering new perspectives to think about what directions the ecological turn could take in classical studies, it revisits old material including ancient Greek religion and mythology with central concepts of contemporary environmental theory. It also critically engages with forms of classical reception in current debates, arguing that ancient ecological knowledge is a powerful resource for creating alternative world views.

Advances in Historical Ecology William L. Balée, 2012-09-18 Ecology is an attempt to understand the reciprocal relationship between living and nonliving elements of the earth. For years, however, the discipline either neglected the human element entirely or presumed its effect on natural ecosystems to be invariably negative. Among social scientists, notably in geography and anthropology, efforts to address this human-environment interaction have been criticized as deterministic and mechanistic. Bridging the divide between social and natural sciences, the contributors to this book use a more holistic perspective to explore the relationships between humans and their environment. Exploring short and long-term local and global change, eighteen specialists in anthropology, geography, history, ethnobiology, and related disciplines present new

perspectives on historical ecology A broad theoretical background on the material factors central to the field is presented such as anthropogenic fire soils and pathogens A series of regional applications of this knowledge base investigates landscape transformations over time in South America the Mississippi Delta the Great Basin Thailand and India The contributors focus on traditional societies where lands are most at risk from the incursions of complex state level societies This book lays the groundwork for a more meaningful understanding of humankind s interaction with its biosphere Scholars and environmental policymakers alike will appreciate this new critical vocabulary for grasping biocultural phenomena

World Ecological Degradation Sing C. Chew, 2001 Deforestation soil runoff salination pollution While recurrent themes of the contemporary world they are not new to us In this broad sweeping review of the environmental impacts of human settlement and development worldwide over the past 5 000 years Sing C Chew shows that these processes are as old as civilization itself With examples ranging from Ancient Mesopotamia to Malaya Mycenaean Greece to Ming China Chew shows that the processes of population growth intensive resource accumulation and urbanization in ancient and modern societies almost universally bring on ecological disaster which often contributes to the decline and fall of that society He then turns his eye to the development of the modern European world system and its impact on the environment Challenging us to change these long term trends Chew also traces the existence of environmental conservation ideas and movements over the span of 5 000 years Can we do it Look at Chew s evidence of the past five millennia and decide Ideal for courses in environmental history anthropology and sociology and world systems theory

Pan's Travail Johnson Donald Hughes, 1994 Many people express surprise writes J Donald Hughes when they are told that environmental problems existed in the ancient world they are used to thinking of the environment as an

exclusively modern concern But an examination of the evidence shows that the Greeks and Romans not only suffered from some of the same predicaments that plague the present scene but in many cases they were aware of them and commented on them In Pan s Travail Hughes examines the environmental history of the classical period and argues that the decline of ancient civilizations resulted in part from exploitation of the natural world Focusing on Greece and Rome as well as on areas subject to their influences Hughes offers a detailed look at the impact of humans and their technologies on the ecology of the Mediterranean basin He explores the complex relationships of human culture and the environment with topics that include deforestation and overgrazing soil erosion depletion of wildlife and natural resources pollution and urban problems such as water supply and sewage disposal He also compares the ancient world s environmental problems to those of other eras and discusses attitudes toward nature expressed in Greek and Latin literature
