Theory and Practice of International Trade Linkage Models A. Italianer,2012-12-06 This book was mainly written while I stayed at the Catholic University of Louvain Professor Anton P Barten was the one who did not only give me a warm welcome in Louvain but also supported my research with most valuable comments and constructive criticisms In addition I benefitted from discussions with Erik Schokkaert Denis de Crombrughe and Jo Baras on various subjects such as the small sample correction of Chapter 9 The arduous task of transferring my neat handwriting into a readable typescript was excellently taken care of by Brs E Crabbe and notably Brs F Duijsens even after working hours Mrs A Molders prevented me of making serious abuse of the English language My admiration for Carien finally is an exponential function of the patience and enthusiasm with which she supported my research Chapter I is a general introduction to the subject of linkage models and it contains few mathematical elaborations Chapters 2 to 4 use more but elementary mathematics and treat several aspects related to the derivation interpretation and estimation of linkage models Chapter 2 deals with the theory of import allocation models Chapter J treats the problem of defining and interpreting elasticities of substitution while Chapter 4 is concerned with the econometric problems related to the estimation of multivariate models with linear restrictions such as import allocation models

Poverty and Famines Amartya Sen,1983-01-20 The main focus of this book is on the causation of starvation in general and of famines in particular The author develops the alternative method of analysis the entitlement approach concentrating on ownership and exchange not on food supply The book also provides a general analysis of the characterization and measurement of poverty Various approaches used in economics sociology and political theory are critically examined The predominance of distributional issues including distribution between different occupation groups links up the problem of conceptualizing poverty with that of analyzing starvation
