ECOOP '96-Object-Oriented Programming ..., 1996 *ECOOP '96 - Object-Oriented Programming* Pierre Cointe, 1996-06-26 This book constitutes the refereed proceedings of the 10th European Conference on Object Oriented Programming ECOOP 96 held in Linz Austria in July 1996 The 21 full papers included in revised version were selected from a total of 173 submissions based on technical quality and originality criteria The papers reflect the most advanced issues in the field of object oriented programming and cover a wide range of current topics including applications programming languages implementation specification distribution databases and design **Ecoop '96 - Object-Oriented Programming** Pierre Cointe, 2014-01-15 **ECOOP '96, Object-oriented Programming**, 2000 **ECOOP '96, Object-oriented Programming** Pierre Cointe, 1996 Ecoop '96--Object-Oriented Programming austria European Conference on Object-Oriented Programming 1996 Linz, Pierre Cointe, EUROPEAN CONFERENCE ON OBJECT-ORIENTED PROGRAMMING, 1996-07-01 **Object-oriented Programming - ECOOP'96**, 1996 **Object-Oriented Programming A Unified Foundation** Giuseppe Castagna, 2012-12-06 by Luea Cardelli Ever since Strachey s work in the 1960 s polymorphism has been classified into the parametric and overloading varieties Parametric polymorphism has been the subject of extensive study for over two decades Overloading on the other hand has often been considered too ad hoc to deserve much attention even though it has been in some form an ingredient of virtually every programming lan guage much more so than parametric polymorphism With the introduction of object oriented languages and in particular with multiple dispatch object oriented languages overloading has become less of a programming convenience and more of a fundamental feature in need of proper explanation This book provides a compelling framework for the study of run time over loading and of its interactions with subtyping and with parametric polymorphism The book also describes applications to object oriented programming This new framework is motivated by the relatively recent spread of programming languages that are entirely based on run time overloading this fact probably explains why this subject was not investigated earlier Once properly understood overloading reveals itself relevant also to the study of older and more conventional single dispatch object oriented languages clarifying delicate issues of covariance and contravariance of method types and of run time type analysis In the final chapters a synthesis is made between parametric and overloading polymorphism **ECOOP '96 Workshop on Prototype Based Object Oriented Programming** Johannes Kepler University of Linz. Institute of Computer Science, 1996 Conceptual Modeling - ER '96 Bernhard Thalheim, 1996-09-25 This volume constitutes the refereed proceedings of the 15th International Conference on Conceptual Modeling ER 96 held in Cottbus Germany in October 1996 The volume presents three invited contributions together with 29 revised full papers selected from 110 submissions The papers cover all current aspects of the entity relationship approach and conceptual modeling they are organized in sections on advanced schema design processes query languages representation integration principles of database design transformation enhanced

modelling capturing design information and evolution **Formal Methods for Components and Objects** Frank S. de Boer, Marcello M. Bonsangue, Susanne Graf, Willem-Paul de Roever, 2005-09-19 Formal methods have been applied successfully to the verification of medium sized programs in protocol and hardware design However their application to the development of large systems requires more emphasis on specification modelling and validation techniques supporting the concepts of reusability and modifiability and their implementation in new extensions of existing programming languages This book presents revised tutorial lectures given by invited speakers at the Third International Symposium on Formal Methods for Components and Objects FMCO 2004 held in Leiden The Netherlands in November 2004 The 14 revised lectures by leading researchers present a comprehensive account of the potential of formal methods applied to large and complex software systems such as component based systems and object systems The book provides an unique combination of ideas on software engineering and formal methods that reflect the expanding body of knowledge on modern software systems

Metalevel Architectures and Separation of Crosscutting Concerns Akinori Yonezawa, Satoshi Matsuoka, 2003-06-30. This volume constitutes the proceedings of REFLECTION 2001, the Third International Conference on Metalevel Architectures and Separation of Crosscutting Concerns, which was held in Kyoto, September 25-28, 2001. Metalevel architectures and reflection have drawn the attention of researchers and practitioners throughout computer science. Reflective and metalevel techniques are being used to address real-world problems in such areas as programming languages, operating systems, databases, distributed computing, expert systems, and web computing. Separation of concerns has been a guiding principle of software engineering for nearly 30 years, but its known benefits are seldom fully achieved in practice. This is primarily because traditional mechanisms are not powerful enough to handle many kinds of concerns that occur in practice. Over the last 10 years, to overcome the limitations of traditional frameworks, many researchers, including several from the reflection community, have proposed new approaches. For the first time, papers on advanced approaches to separation of concerns were explicitly solicited. Following the success of previous conferences such as IMSA 92 in Tokyo, Reflection 96 in San Francisco, and Reflection 99 in Saint Malo, we hope that the conference provided an excellent forum for researchers with a broad range of interests in metalevel architectures, reflective techniques, and separation of concerns in general.

Concurrent Object-Oriented Programming and Petri Nets Gul A. Agha, 2001-04-18. Concurrency and distribution have become the dominant paradigm and concern in computer science. Despite the fact that much of the early research in object-oriented programming focused on sequential systems, objects are a natural unit of distribution and concurrency, as elucidated early on by research on the Actor model. Thus, models and theories of concurrency, the oldest one being Petri nets and their relation to objects, are an attractive topic of study. This book presents state-of-the-art results on Petri nets and concurrent object-oriented programming in a coherent and competent way. The 24 thoroughly reviewed and revised papers are organized in three sections. The first consists of long papers, each presenting a detailed approach to integrating Petri nets and object orientation. Section II includes shorter papers with emphasis on concrete examples to demonstrate the approach. Finally, section III is devoted to papers which significantly build on the Actor model of computation.

From Object-Orientation to Formal Methods Olaf Owe, Stein Krogdahl, Tom Lyche, 2004-03-31. Turing Award. For ideas fundamental to the emergence of object-oriented programming through their design of

the programming languages Simula I and Simula 67 This Festschrift opens with a short biography and a bibliography recollecting Ole Johan Dahl s life and work as well as a paper he wrote entitled The Birth of Object Orientation the Simula Languages The main part of the book consists of 14 scientific articles written by leading scientists who worked with Ole Johan Dahl as students or colleagues In accordance with the scope of Ole Johan Dahl s work and the book s title the articles are centered around object orientation and formal methods
