Eleanor Raymond Architect:

Eleanor Raymond, Architect Doris Cole, 1981 Eleanor Raymond Eleanor Raymond, Institute of Contemporary Art (Boston, Mass.), 1981 *Eleanor Raymond, Architect* Eleanor Raymond, Harvard University. Graduate School of Design, 1987 Building Context Nancy Beth Gruskin, 1998 **The First American Women Architects** Sarah Allaback, 2008 An invaluable reference covering the history of women architects Eleanor Raymond Lamia Doumato, 1982 *Women and the Making of the Modern House* Alice T. Friedman, 2006-01-01 Investigates how women patrons of architecture were essential catalysts for innovation in domestic architectural design This book explores the challenges that unconventional attitudes and ways of life presented to architectural thinking and to the architects themselves **The Women Who Changed Architecture** Jan Cigliano Hartman, 2022-03-29 A visual and global chronicle of the triumphs challenges and impact of over 100 women in architecture from early practitioners to contemporary leaders Marion Mahony Griffin passed the architectural licensure exam in 1898 and created exquisite drawings that buoyed the reputation of Frank Lloyd Wright Her story is one of the many told in *The Women Who Changed Architecture* which sets the record straight on the transformative impact women have made on architecture With in depth profiles and stunning images this is the most comprehensive look at women in architecture around the world from the nineteenth century to today Discover contemporary leaders like MacArthur Fellow Jeanne Gang spearheading sustainable design initiatives reimagining cities as equitable spaces and directing architecture schools An essential read for architecture students architects and anyone interested in how buildings are created and the history behind them *A House in the Sun* Daniel A. Barber, 2016-10-13 *A House in the Sun* describes a number of experiments in solar house heating in American architectural engineering political economic and corporate contexts from the beginning of World War II until the late 1950s Houses were built across the Midwest Northeast and Southwestern United States and also proposed for sites in India South Africa and Morocco These experiments developed in parallel to transformations in the discussion of modern architecture relying on new materials and design ideas for both energy efficiency and claims to cultural relevance Architects were among the myriad cultural and scientific actors to see the solar house as an important designed element of the American future These experiments also developed as part of a wider analysis of the globe as an interconnected geophysical system Perceived resource limitations in the immediate postwar period led to new understandings of the relationship between energy technology and economy The solar house both as a charged object in the milieu of suburban expansion and as a means to raise the standard of living in developing economies became an important site for social technological and design experimentation This led to new forms of expertise in architecture and other professions Daniel Barber argues that this mid century interest in solar energy was one of the first episodes in which resource limitations were seen as an opportunity for design to attain new relevance for potential social and cultural transformations Furthermore the solar discussion established both an intellectual framework and a funding structure

for the articulation of and response to global environmental concerns in subsequent decades In presenting evidence of resource tensions at the beginning of the Cold War the book offers a new perspective on the histories of architecture technology and environmentalism one more fully entangled with the often competing dynamics of geopolitical and geophysical pressures *The Architect* Spiro Kostof,2000 The Architect traces the role of the profession across the centuries and in different cultures showing the architect both as designer and as mediator between the client and the builder

[Architectural Engineering: New Concepts, New Methods, New Materials, New Applications](#) Architectural Record (New York, N.Y.),1925 **The Early Architecture Of Western Pennsylvania** Charles Morse Stotz,2023-07-13 A new edition of this long unavailable classic reproduces photographic prints made from original negatives and features an extensive

analytical introduction by the noted architectural historian Dell Upton Before the 1936 publication of *The Early Architecture of Western Pennsylvania* the architectural heritage of a region prominent in the history of early America had been almost totally neglected Based on a four year survey conducted by the Pittsburgh chapter of the American Institute of Architects Charles Morse Stotz's book provides the definitive description and analysis of structures ranging from log houses to colonial and Georgian structures to examples of the pre Civil War Gothic revival The volume defines the local architectural idiom as an expression of the frontier and early industrial societies that played such an important part in the history of nineteenth century America This oversized volume of 416 black and white photographs 81 measured drawings and an extensive text presents a splendid array of early dwellings barns and other outbuildings churches arsenals banks inns commercial buildings tollhouses mills and even tombstones Time has proved this work to be the definitive record of an architectural heritage that was fast disappearing with the economic boom of World War II and the postwar years *The Early Architecture of Western Pennsylvania* is also a work of precision beauty and integrity The drawings ignore alterations made after 1960 and show the buildings in their original condition giving special attention to details such as window sashes shutters cornices and roofs The floor plan of each structure is included and line drawings display the profiles of moldings and ornamentation Signature stones and hardware convey the quality of the early craftsmen's work In all cases stone joining has been faithfully drawn joint for joint to record the charm of old wall patterns This new edition makes a landmark book available to a new generation of readers one especially aware of the importance of architectural preservation and guarding the history of the Western Pennsylvania region

Encyclopedia of Lesbian and Gay Histories and Cultures Bonnie Zimmerman, George Haggerty, 2021-06-13 A rich heritage that needs to be documented Beginning in 1869 when the study of homosexuality can be said to have begun with the establishment of sexology this encyclopedia offers accounts of the most important international developments in an area that now occupies a critical place in many fields of academic endeavors It covers a long history and a dynamic and ever changing present while opening up the academic profession to new scholarship and new ways of thinking A groundbreaking new approach While gays and lesbians have shared many aspects of life their histories and cultures developed in profoundly different ways To reflect this crucial fact the encyclopedia has been prepared in two separate volumes assuring that both histories receive full unbiased attention and that a broad range of human experience is covered Written for and by a wide range of people Intended as a reference for students and scholars in all fields as well as for the general public the encyclopedia is written in user friendly language At the same time it maintains a high level of scholarship that incorporates both passion and objectivity It is written by some of the most famous names in the field as well as new scholars whose research continues to advance gender studies into the future

Modern Architecture and Climate Daniel A. Barber, 2023-04-11 How climate influenced the design strategies of modernist architects *Modern Architecture and Climate* explores how leading architects of the twentieth century incorporated climate mediating strategies

into their designs and shows how regional approaches to climate adaptability were essential to the development of modern architecture. Focusing on the period surrounding World War II before fossil fuel powered air conditioning became widely available, Daniel Barber brings to light a vibrant and dynamic architectural discussion involving design materials and shading systems as means of interior climate control. He looks at projects by well known architects such as Richard Neutra, Le Corbusier, Licio Costa, Mies van der Rohe, and Skidmore, Owings and Merrill, and the work of climate focused architects such as MMM, Roberto Ogilvy and Ogilvy, and Cliff May. Drawing on the editorial projects of James Marston Fitch, Elizabeth Gordon, and others, he demonstrates how images and diagrams produced by architects helped conceptualize climate knowledge alongside the work of meteorologists, physicists, engineers, and social scientists. Barber describes how this novel type of environmental media catalyzed new ways of thinking about climate and architectural design. Extensively illustrated with archival material, *Modern Architecture and Climate* provides global perspectives on modern architecture and its evolving relationship with a changing climate, showcasing designs from Latin America, Europe, the United States, the Middle East, and Africa. This timely and important book reconciles the cultural dynamism of architecture with the material realities of ever increasing carbon emissions from the mechanical cooling systems of buildings and offers a historical foundation for today's zero carbon design.

Reconstructing Architecture Thomas A. Dutton, Lian Hurst Mann, 1996. *Reconstructing Architecture* was first published in 1996. Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions. To create architecture is an inherently political act, yet its nature as a social practice is often obscured beneath layers of wealth and privilege. The contributors to this volume question architecture's complicity with the status quo, moving beyond critique to outline the part architects are playing in building radical social movements and challenging dominant forms of power. The making of architecture is instrumental in the construction of our identities, our differences, the world around us, much of what we know of institutions, the distribution of power, social relations, and cultural values is mediated by the built environment. Historically, architecture has constructed the environments that house the dominant culture. Yet, as the essays in *Reconstructing Architecture* demonstrate, there exists a strong tradition of critical practice in the field, one that attempts to alter existing social power relations. Engaging the gap between modernism and postmodernism, each chapter addresses an oppositional discourse that has developed within the field and then reconstructs it in terms of a new social project: feminism, social theory, environmentalism, cultural studies, race and ethnic studies, and critical theory. The activists and scholars writing here provide a clarion call to architects and other producers of culture, challenging them to renegotiate their political allegiances and to help reconstruct a viable democratic life in the face of inexorable forces driving economic growth, destroying global ecology, homogenizing culture, and privatizing the public realm. *Reconstructing Architecture* reformulates the role of architecture in society as well as its capacity to further a progressive social transformation.
