The Spiritual Anatomy of Emotion Michael A. Jawer,2009-05-21 A cutting edge examination of feelings not thoughts as the gateway to understanding consciousness Contends that emotion is the greatest influence on personality development Offers a new perspective on immunity stress and psychosomatic conditions Explains how emotion is key to understanding out of body experience apparitions and other anomalous perceptions Contemporary science holds that the brain rules the body and generates all our feelings and perceptions Michael Jawer and Dr Marc Micozzi disagree They contend that it is our feelings that underlie our conscious selves and determine what we think and how we conduct our lives The less consciousness we have of our emotional being the more physical disturbances we are likely to have from ailments such as migraines fibromyalgia chronic fatigue and post traumatic stress to anomalous perceptions such as apparitions and involuntary out of body experiences Using the latest scientific research on immunity sensation stress cognition and emotional expression the authors demonstrate that the way we process our feelings provides a key to who is most likely to experience these phenomena and why They explain that emotion is a portal into the world of extraordinary perception and they provide the studies that validate the science behind telepathic dreams poltergeists and ESP The Spiritual Anatomy of Emotion challenges the prevailing belief that the brain must necessarily rule the body Far from being by products of neurochemistry the authors show that emotions are the key vehicle by which we can understand ourselves and our interactions with the world around us as well as our most intriguing and perennially baffling experiences

natural phenomenon that appears to have supernatural consequences He examines ESP poltergeist disturbances psychokinesis electric people UFOs and other paranormal phenomena from an electromagnetic perspective He also reveals how the artificial alien energies we've been introducing into our environment shape the way we experience the paranormal

Strange Electromagnetic Dimensions explores such questions as Do human beings possess a magnetic sixth sense similar to that of homing pigeons Are artificial electromagnetic fields such as those emitted by power lines gradually destroying our health Can being struck by lightning or suffering a severe electric shock result in the development of psychic abilities What do scientists make of the fact that ball lightning can pass through walls enter rooms by squeezing through keyholes and display seemingly intelligent behavior
