Interactive Granular Computations in Networks and Systems Engineering: A Practical Perspective Andrzej Jankowski,2017-06-25 The book outlines selected projects conducted under the supervision of the author Moreover it discusses significant relations between Interactive Granular Computing IGrC and numerous dynamically developing scientific domains worldwide along with features characteristic of the author s approach to IGrC The results presented are a continuation and elaboration of various aspects of Wisdom Technology initiated and developed in cooperation with Professor Andrzej Skowron Based on the empirical findings from these projects the author explores the following areas a understanding the causes of the theory and practice gap problem TPGP in complex systems engineering CSE b generalizing computing models of complex adaptive systems CAS in particular natural computing models by constructing an interactive granular computing IGrC model of networks of interrelated interacting complex granules c granules belonging to a single agent and or to a group of agents c developing methodologies based on the IGrC model to minimize the negative consequences of the TPGP The book introduces approaches to the above issues using the proposed IGrC model In particular the IGrC model refers to the key mechanisms used to control the processes related to the implementation of CSE projects One of the main aims was to develop a mechanism of IGrC control over computations that model a project s implementation processes to maximize the chances of its success while at the same time minimizing the emerging risks In this regard the IGrC control is usually performed by means of properly selected and enforced among project participants project principles These principles constitute examples of c granules expressed by complex vague concepts represented by c granules too The c granules evolve with time in particular the meaning of the concepts is also subject of change This methodology is illustrated using project principles applied by the author during the implementation of the POLTAX AlgoTradix Merix and Excavio projects outlined in the book

Roundabouts as Safe and Modern Solutions in Transport Networks and Systems Elżbieta Macioszek,Rahmi Akçelik,Grzegorz Sierpiński,2018-07-31 This book offers a collection of guidelines that will be particularly useful to those

making decisions concerning roundabouts as safe and modern solutions in transport networks and systems The decision making support systems described here will interest those who face the challenge of finding solutions to problems concerning modern transport systems on a daily basis Consequently the book is chiefly intended for local authorities involved in planning and preparing development strategies for specific transport related issues in both urban and regional contexts as well as for representatives of business and industry who are directly engaged in the implementation of traffic engineering solutions The guidelines provided in the respective chapters help to address the given problem soundly and to simplify the selection of an appropriate strategy The topics covered include traffic conditions and the performance of single lane two lane and turbo roundabouts road traffic safety analysis analysis of road traffic safety improvements surrogate safety measures at roundabouts analysis of pedestrian behavior at pedestrian crossings with public transport vehicles methods for assessing vehicle motion trajectory at single lane roundabouts using visual techniques making compact two lane roundabouts effective for vulnerable road users concepts for wireless electric vehicle charging near roundabouts work zones and temporary traffic control at roundabouts Since the book also considers new approaches to theoretical models including modeling roundabout capacity models of critical gaps and follow up headways for turbo roundabouts and estimating roundabout delay while taking into account pedestrian impact it will also appeal to researchers and scientists studying these problems The book gathers selected papers presented at the 15th Scientific and Technical Conference Transport Systems Theory and Practice organized by the Department of Transport Systems and Traffic Engineering Silesian University of Technology in Katowice Poland on September 17 19 2018 *University of Michigan Official Publication* University of Michigan, 1988 Each number is the

Information Pathways Martin Ziegler, Thomas Mussenbrock, Hermann Kohlstedt, 2023-09-19 This open access book offers a timely and comprehensive review of the field of neurotronics Gathering cutting edge contributions from neuroscientists biologists psychologists as well as physicists microelectronics engineers and information scientists it gives extensive information on fundamental information pathways in selected nervous systems It also highlights their relevance as building blocks for novel computing architectures such as bio inspired electronic devices neuromorphic architectures memristive devices adaptive sensors and emergent pulsed coupled oscillatory networks All in all this book offers a unique bridge between fundamental research in neuroscience neural information processing nonlinear dynamics and self organization and advanced practical applications concerning the fabrication of hardware oriented computing Women in

Telecommunications Maria Sabrina Greco, Dajana Cassioli, Silvia Liberata Ullo, Margaret J. Lyons, 2023-10-05 This book provides a breadth of innovative and impactful research in the field of telecommunications led by women investigators Topics covered include satellite communications cognitive radars remote sensing sensor networks quantum Internet and cyberspace

These topics touch on many of the challenges facing the world today and these solutions by women researchers are valuable for their technical excellence and their non traditional perspective As an important part of the Women in Engineering and Science book series the work highlights the contribution of women leaders in telecommunications inspiring women and men girls and boys to enter and apply themselves to secure our future in The Electrical Journal ,1901 **U.S. Government Research & Development Reports** ,1965 *Petroleum Mining and Oil-field Development* Arthur Beeby-Thompson,1910
