Electro-optical System Design, Simulation, Testing, and Training Richard M. Wasserman, Scott Lawrence DeVore, 2002

The past few years have seen an upsurge in the numbers of known Neolithic settlements in Ireland. Many of these sites have been excavated by archaeologists based in field units but few are well known to the wider archaeological community. The papers in this volume were presented at a conference held at Queen's University Belfast in 2001 which provided a forum for a discussion of the new Neolithic material from Ireland in its wider geographical context. Although the bulk of the emerging Irish settlement evidence relates to substantial houses, many of these papers consider wider themes including issues of contact and communication along the sea routes and coastal margins of north west Europe, questions of diversity and regional patterns of sedentism and mobility and variations in regional food production strategies.

Encyclopedia of Optical and Photonic Engineering (Print) - Five Volume Set Craig Hoffman, Ronald Driggers, 2015-09-22. The first edition of the Encyclopedia of Optical and Photonic Engineering provided a valuable reference concerning devices or systems that generate, transmit, measure or detect light and to a lesser degree the basic interaction of light and matter. This Second Edition not only reflects the changes in optical and photonic engineering that have occurred since the first edition was published but also boasts a wealth of new material expanding the encyclopedia's length by 25 percent. Contains extensive updates with significant revisions made throughout the text. Features contributions from engineers and scientists leading the fields of optics and photonics today. With the addition of a second editor, the Encyclopedia of Optical and Photonic Engineering Second Edition offers a balanced and up to date look at the fundamentals of a diverse portfolio of technologies and discoveries in areas ranging from x-ray optics to photon entanglement and beyond. This edition's release corresponds nicely with the United Nations General Assembly's declaration of 2015 as the International Year of Light, working in tandem to raise awareness about light's important role in the modern world.
