Electromagnetic Modelling And Measurements For Analysis And Synthesis Problems:

Electromagnetic Modelling and Measurements for Analysis and Synthesis Problems B. de Neumann, 2012-12-06 In this volume is presented the proceedings of a NATO Advanced Study Institute ASI on the theme of Electromagnetic Modelling and Measurements for Analysis and Synthesis Problems The ASI was held at 11 Ciocco Castelveccchio Pascoli Tuscany Italy August 10th 21st 1987 It has been my good fortune to act as co director of two of Jozef s previous ASIs and so I am well acquainted with the JKS format for ASIs As participants will realise I did not attend this ASI and so I only have a partial appreciation of the programme In particular it has not been possible to include transcripts of any panel discussions which may have taken place Readers may recall that such transcripts have formed a most interesting and useful part of previous ASI proceedings edited by Jozef Skwirzynski and helped to convey the spirit of the meetings Unfortunately it has proved impossible to locate the tapes despite the best efforts of Jozef s assistant Barry Stuart A further difficulty has arisen through the untimely death of Jozef s former deputy and colleague at GEC Research Ed Pacello who assisted Jozef with the organisation of the precursor of this ASI The following is taken from original material relating to the aims of the Advanced Study Institute PURPOSE OF THE INSTITUTE This Institute is concerned with computer modelling and with experimental measurements as two complementary tools for both analysis and synthesis of electromagnetics EM infra red IR and optical problems *Electromagnetic Modelling and Measurements for Analysis and Synthesis Problems* B De Neumann, 1991-06-30

Time Domain Electromagnetics Sadasiva M. Rao, 1999-07-26 Time Domain Electromagnetics deals with a specific technique in electromagnetics within the general area of electrical engineering This mathematical method has become a standard for a wide variety of applications for design and problem solving This method of analysis in electromagnetics is directly related to advances in cellular and mobile communications technology as well as traditional EM areas such as radar antennas and wave propagation Most of the material is available in the research journals which is difficult for a non specialist to locate read understand and effectively use for the problem at hand Only book currently available to practicing engineers and research scientists exclusively devoted to this subject Includes contributions by the world s leading experts in electromagnetics Presents the most popular methods used in time domain analysis are included at one place with thorough discussion of the methods in an easily understandable style In each chapter many simple and practical examples are discussed thoroughly to illustrate the salient points of the material presented All chapters are written in a consistent style that allows the book to be of use for self study by professionals as well as for use in a graduate level course in electrical engineering **The Cumulative Book Index**, 1992 A world list of books in the English language Ultra-wideband, Short-pulse Electromagnetics Henry L.
