**Electronic Commerce: Concepts, Methodologies, Tools, and Applications** Becker, Annie, 2007-12-31 Compiles top research from the world's leading experts on many topics related to electronic commerce. Covers topics including mobile commerce, virtual enterprises, business-to-business applications, Web services, and enterprise methodologies. The WTO, the Internet and Trade in Digital Products Sacha Wunsch-Vincent, 2006-01-20 The rapid development of the Internet has led to a growing potential for electronic trade in digital content like movies, music, and software. As a result, there is a need for a global trade framework applicable to such digitally delivered content products. Yet digital trade is currently not explicitly recognised by the trade rules and obligations of the World Trade Organization (WTO). This study provides a complete analysis of the related challenges in the ongoing WTO Doha Negotiations to remedy this state of affairs. It elaborates on the required measures in the multilateral negotiations to achieve market access for digital content and examines the obstacles that lie on the path to reach consensus between the United States and the European Communities. Negotiation parameters analysed include the current US and EC regulatory approach to audiovisual and information society services and the evolution of their applicable trade policy jurisdiction. Finally, this examination takes stock of how the Doha Negotiations and parallel US-driven preferential trade agreements have so far contributed to securing free trade in digital content. As new technologies are an increasingly prominent source of trade dispute, this book is an assessment of how WTO Members can maintain the relevance of the multilateral trade framework in a changing technological and economic environment. This important work highlights the missed opportunity in ongoing global trade talks: the failure to pursue a free trade framework for digitally delivered content. If not corrected, one can readily imagine the rise of discriminatory barriers to digital trade of the type that have dogged global trade flows for years and a failed recognition by the WTO of the reality of modern commerce. The WTO should, as the author argues, put a spotlight on electronic trade and move forward in a comprehensive fashion. Ambassador Charlene Barshefsky, Former United States Trade Representative. Wunsch-Vincent provides a comprehensive analysis of the challenges to establish a liberal trade regime for trade in digital products. This book will become an important point of reference for anybody interested in e-commerce and the WTO. Carlos A. Primo Braga, Senior Adviser, International Trade Department, The World Bank. *E-Commerce and Development Report 2004* United Nations Conference on Trade and Development, 2004 Information and communications technologies (ICT) have considerable potential to promote development and economic growth by helping to foster innovation, improve productivity, and expand the knowledge capacity of developing countries, especially for small and medium-sized enterprises.
