Hou, 2012-09-01 This book brings satisfying definition and clarity to this field at last Exploring the substantive differences between competition law and sector specific regulation after the methodological integration it presents the first detailed analysis of the many hundreds of notifications and Commission letters generated under the Article 7 procedure identifying the most relevant cases dealing with market definition market power and remedies It compares these decisions with relevant competition law cases and highlights elements with a bearing on sector specific regulation It also offers hugely valuable guidance through the vast amount of documents in the Commission's CIRCA database Topics and issues raised include the following definition of product markets delineation of geographic markets including sub national different practices in relation to assessing single market power and collective market power and competition problems such as refusal to deal margin squeeze non price discrimination and excessive pricing There can be little doubt that this is the new reference point for researchers and practitioners in this domain By systematically categorizing the concepts and legal criteria and building a solid theoretical framework on the intersection of competition law and sector specific regulation the author has created a resource that is sure to be welcomed by all those involved in regulation of electronic communications markets and network industries in general academic scholars telecommunications regulators at the EU and Member State levels competition authorities law firms specializing in IT communications law practitioners in IT and telecommunications companies and

Committee on the Judiciary, 2000 *Achieving the Internal Market for e-communications* Andrea Renda, 2008 Over the past two years the debate on the review of the EU regulatory framework for electronic communications has become hectic After the European Commission adopted its proposed set of measures in November 2007 the European Parliament has shown an unprecedented interest in topics such as spectrum policy functional separation of the incumbents networks the creation of a new European authority on telecoms etc After the successful experience of the first CEPS Task Force on Policy Challenges for the Information Superhighway which ended in June 2006 a new Task Force on Achieving the Internal Market for e communications was launched by CEPS with the explicit aim to provide expertise to Members of the European Parliament in their reading of the proposed review The Task Force was chaired by Magnus Lemmel former Acting Director General at DG Enterprise European Commission and currently Senior Advisor at KREAB This report summarises the results of the opinions that were expressed over five meetings the last two of which took place inside the European Parliament This highly influential report was drafted by Andrea Renda Senior Research Fellow at CEPS **The Electronic Communications Code and Property Law** Falcon Chambers, 2018-10-11 Life now without access to electronic telecommunications would be regarded as highly unsatisfactory by most of the UK population Such ready access would not have been achieved without methodical and ultimately enforceable means of access to the land on which to install the infrastructure necessary to support the development of an electronic communications network Successive governments have made such access a priority regarding it as a principle that no person should unreasonably be denied access to an electronic communications network or electronic communications services The enactment of the Telecommunications Act 1984 and its revision by the Communications Act in 2003 have played their role in the provision of an extensive electronic infrastructure in the UK while their reshaping by means of the Digital Economy Act 2017 will continue that process Throughout that process a little publicised series of struggles has taken place between telecommunications operators and landowners as they seek to interpret the Electronic Communications Code by which their rights and obligations have been regulated This book describes the problems that accompanied the Old Code which will continue to regulate existing installations and agreements and the intended solutions under the New Code The eminent team of authors explain the background provisions and operation of the old code and the new one providing practical and jargon free guidance throughout It is sure to become the reference on this topic and is intended as a guide for telecommunications operators land owners and of course for their advisers in the legal and surveying professions All members of Falcon Chambers comprising nine Queen s Counsel and 30 junior barristers

specialise in property law and allied topics including the various incarnations of the Electronic Communications Code Members of Falcon Chambers including all the authors of this new work have for many years lectured and written widely on the code and have appeared acting for both operators and landowners in many of the few reported cases on the subject of the interface between property law and the code including for example *Geo Networks Ltd v The Bridgewater Canal Co Ltd* 2010 *Geo Networks Ltd v The Bridgewater Canal Co Ltd* 2011 *Crest Nicholson Operations Ltd v Arqiva Services Ltd* 2015 *Brophy v Vodafone Ltd* 2017      Electronic Communication Privacy United States.
