POISONS®
INFORMATION CENTRE OF IRELAND

Monday to Friday 9am – 5pm

If you think your child
has been poisoned

What should you do?

1. Stay calm but act quickly.
2. Take the poison away from your child.
3. If the poison was eaten, make the child spit it out, run your fingers around their mouth and flick out any remaining pieces.
4. Never make your child vomit.
5. If a chemical has splashed into the eyes, wash the eyes with tap water for 15 minutes.
6. Wash any skin that was in contact with the poison with soap and water.
7. **Call the Poisons Information Centre (01) 809 2166 (9am – 5pm)**
8. Always take the product container with you to the telephone or to the GP or hospital.

Be ready to answer the following questions

1. What was taken?
2. How much was taken?
3. What is the child's age and weight?
4. Does the child have symptoms?
5. Does the child have an existing medical problem?
6. What time did the poisoning occur?
7. Is there information on the container?
8. What is the product used for?

Signs and symptoms of poisoning

The signs and symptoms of poisoning can be delayed.
Always seek advice!

Guidelines For Poison Control

**International Program on Chemical
Safety, World Health Organization**

Guidelines For Poison Control:

Guidelines for Poison Control International Program on Chemical Safety, World Health Organization, 1997 Provides authoritative guidelines for the establishment or improvement of national programmes for poison control Addressed to policy makers and the administrators of specialized facilities the book responds to the need for comprehensive advice on the most rationale and effective ways to manage the greatly increased number of poisoned patients seen throughout the world Strategies for the prevention of poisoning are also described The guidelines draw on the practical experiences of numerous well established poison centres in different parts of the world Although recommended lines of action have universal relevance the book gives particular attention to the situation in developing countries where a basic infrastructure for the care of poisoned patients is often absent and special problems arise from the lack of adequate communications transportation drugs and support services Throughout emphasis is placed on the role and functions of a poison information centre as a crucial component of any national programme for poison control The book has nine chapters presented in two parts Part one provides an overview of the policy issues surrounding decisions to introduce measures including specialized facilities for the prevention and management of poisoning Arguing that a poison information centre should be available in every country part one also describes the benefits of such centres outlines their principal functions and suggests various options for their logical and cost effective operation Against this background part two provides detailed technical advice on how to organize and operate the various facilities and services that make up a comprehensive system for poison control Separate chapters describe the functions and requirements of information services clinical services and analytical toxicological and other laboratory services and discuss the importance of toxicovigilance as a strategy for prevention Subsequent chapters explain how to deal with major emergencies involving toxic chemicals and outline solutions to the problem encountered in most developing countries of obtaining essential antidotes Part two concludes with advice on the design and content of forms for collecting storing and reporting data followed by a detailed list of the main literature required in a poisons information centre Additional practical information is provided in a series of annexes which describe a computer software system for the management of poisons data reproduce several model record and reporting forms and classify a large number of antidotes and related agents according to their proven effectiveness and urgency of availability For those involved in improving safety this book is a bible It is very difficult to be critical of this outstanding work an essential reference for all those involved in the use and handling of chemicals For regulators and those concerned with government policy issues it should be compulsory reading Chemistry and Industry **Guidelines for poison control** World Health Organization WHO., 1997 **Guidelines for Poison Control** , 1997 *Departments of Labor, Health and Human Services, Education, and Related Agencies Appropriations for 2003: Department of Health and Human Services, Public Health Service (excluding the National Institutes of Health)* United States.
