*Reading the Book of Nature* Jonathan R. Topham, 2022-10-12 A powerful reimagining of the world in which a young Charles Darwin developed his theory of evolution When Charles Darwin returned to Britain from the Beagle voyage in 1836 the most talked about scientific books of the day were the Bridgewater Treatises This series of eight works was funded by a bequest of the last Earl of Bridgewater and written by leading men of science appointed by the president of the Royal Society to explore the Power Wisdom and Goodness of God as manifested in the Creation Securing public attention beyond all expectations the series offered Darwin's generation a range of approaches to one of the great questions of the age how to incorporate the newly emerging disciplinary sciences into Britain's overwhelmingly Christian culture Drawing on a wealth of archival and published sources including many unexplored by historians Jonathan R Topham examines how and to what extent the series contributed to a sense of congruence between Christianity and the sciences in

ways     *Enlightened Evangelicalism* Jonathan Yeager, 2011-03-01 John Erskine was the leading evangelical in the Church of Scotland in the latter half of the eighteenth century. Educated at Edinburgh University, he learned to appreciate the epistemology of John Locke and other empiricists alongside key Scottish Enlightenment figures. As a clergyman, he integrated the style and moral teachings of the Moderate Enlightenment into his discourses and posited new theories on traditional views of Calvinism in his theological treatises. While widely recognized as an able preacher and theologian, Erskine's primary contribution to evangelicalism was as a disseminator. He sent countless religious and philosophical works to correspondents like Jonathan Edwards so that he and others could learn about current ideas, update their writings, and provide an apologetic against perceived heretical authors. Erskine also was crucial in the publishing of books and pamphlets by some of the best evangelical theologians in America and Britain. Within his lifetime, Erskine's main contribution was as a propagator of an enlightened form of evangelicalism. While there is a great deal of scholarship on Jonathan Edwards and John Wesley, Yeager argues that it is time to expand the scholarship of eighteenth-century evangelicalism by turning to one of their lesser-studied colleagues. In this new biography of Erskine, Jonathan Yeager lays out the life and thought of a hitherto under-researched yet in his day widely respected preacher and gives Erskine the scholarly treatment that he so richly deserves.     *American Publishers' Circular and Literary Gazette*, 1858     **Historic Homes and Places and Genealogical and Personal Memoirs Relating to the Families of Middlesex County, Massachusetts** William Richard Cutter, 1908
