Journal Pennsylvania. General Assembly. House of Representatives, 1839 **Journal** Pennsylvania. General Assembly. Senate, 1839 Historical Dictionary of the Discovery and Exploration of the Northwest Coast of America Robin Inglis, 2008-04-02 The Northwest Coast of America ranging from northern California through Oregon Washington and British Columbia all the way up to Alaska was the last temperate coastline to be placed on the world map First visited by Russians in 1741 and thought to contain a navigable passage between the Pacific and the Atlantic it was systematically revealed during an intense period of exploratory and commercial activity from the 1770s to the 1790s Subsequently the imperial ambitions of Russia Spain and Britain and an assumption of manifest destiny by the United States led to further exploration and ensured that the region would become disputed territory before national boundaries were determined in the mid 19th century The Historical Dictionary of the Discovery and Exploration of the Northwest Coast of America tells of the heroic endeavors and remarkable achievements the endless speculation about a northwest passage and the fighting and manipulation for commercial advantage that surrounded this terrain This is done through an introductory essay a detailed chronology an extensive bibliography modern maps and selected historical maps and drawings and over 400 cross referenced dictionary entries Entries cover the native people encountered the scientists and artists who left an invaluable documentary and visual record of people places flora and fauna the numerous voyages taken by men such as Vitus Bering James Cook Juan Francisco de la Bodega y Quadra and George Vancouver overland expeditions like those of Alexander Mackenzie Simon Fraser Meriwether Lewis and William Clark and David Thompson and maritime fur traders including George Dixon Grigori Shelikhov Robert Gray and William Sturgis No other dictionary exists that is dedicated solely to the coverage of this region

culture area present day Oregon and Washington west of the Cascade Mountains British Columbia west of the Coast Range and southeast Alaska in the first century of contact and the effects of these new diseases on Native American population size structure interactions and viability The emphasis is on epidemic diseases and specific epidemic episodes In most parts of the Americas disease transfer and depopulation occurred early and are poorly documented Because of the lateness of Euro American contact in the Pacific Northwest however records are relatively complete and it is possible to reconstruct in some detail the processes of disease transfer and the progress of specific epidemics compute their demographic impact and discern connections between these processes and culture change Boyd provides a thorough compilation analysis and comparison of information gleaned from many published and archival sources both Euro American trading company mission and doctors records ships logs diaries and Hudson s Bay Company and government censuses and Native American oral traditions and informant testimony The many quotations from contemporary sources underscore the magnitude of the human suffering The Coming of the Spirit of Pestilence is a definitive study of introduced diseases in the Pacific Northwest For more information on the author go to <http://roberttboyd.com>

The Chinook Indians Robert H. Ruby, John A. Brown, 1976 The Chinook Indians who originally lived at the mouth of the Columbia River in present day Oregon and Washington were experienced traders long before the arrival of white men to that area When Captain Robert Gray in the ship Columbia Rediviva for which the river was named entered the Columbia in 1792 he found the Chinooks in an important position in the trade system between inland Indians and those of the Northwest Coast The system was based on a small seashell the dentalium as the principal medium of exchange The Chinooks traded in such items as sea otter furs elkskin armor which could withstand arrows seagoing canoes hollowed from the trunks of giant trees and slaves captured from other tribes Chinook women held equal status with the men in the trade and in fact the women were preferred as traders by many later ships captains who often feared and distrusted the Indian men The Chinooks welcomed white men not only for the new trade goods they brought but also for the new outlets they provided Chinook goods which reached Vancouver Island and as far north as Alaska The trade was advantageous for the white men too for British and American ships that carried sea otter furs from the Northwest Coast to China often realized enormous profits Although the first white men in the trade were seamen land based traders set up posts on the Columbia not long after American explorers Lewis and Clark blazed the trail from the United States to the Pacific Northwest in 1805 John Jacob Astor s men founded the first successful white trading post at Fort Astoria the site of today s Astoria Oregon and the North West Company and the Hudson s Bay Company soon followed into the territory As more white men moved into the area the Chinooks began to lose their favored position as

middlemen in the trade Alcohol new diseases such as smallpox influenza and venereal disease intertribal warfare and the growing number of white settlers soon led to the near extinction of the Chinooks By 1 51 when the first treaty was made between them and the United States government they were living in small fragmented bands scattered throughout the territory Today the Chinook Indians are working to revive their tribal traditions and history and to establish a new tribal economy within the white man s system

Contact and Conflict Robin Fisher,2011-11-01 Originally published in 1977 Contact and Conflict has remained an important book which has inspired numerous scholars to examine further the relationships between the Indians and the Europeans fur traders as well as settlers For this edition Robin Fisher has written a new introduction in which he surveys the literature since 1977 and comments on any new insights into these relationships Fisher contends that the fur trade had originally brought minimal cultural change to the Indians In 1858 it essentially came to an end and with the beginning of white settlement there was a fundamental change in the relationship between Indians and Europeans What had been a reciprocal system between the two civilizations became a pattern of white dominance He shows that while the Indians had been able to adjust gradually to the changes introduced by the traders in the contact period they lost control of their culture under the impact of colonization
