Nyrop,1980 **Jordan** Beverley Milton-Edwards,Peter Hinchcliffe,2001 This volume offers an overview of the history politics and economics of this fascinating country it s main focus being on King Hussein s reign his quest to modernise his internal struggle with the Palestinians and his pursuit of peace in the area Jordan Alan George,2013-07-18 Jordan has played a bigger role in Middle Eastern affairs than its size and economy might warrant due to its huge Palestinian population its strategic location between Israel the West Bank Syria and Iraq and its uniquely close relationship with successive British and US administrations Drawing on numerous visits to the country and interviews with a diversity of people from King Abdullah down Alan George describes how its reasonably stable monarchical system unlike that in most Arab countries has allowed the halting development of civil society and maintained control through the skilful co option of opponents rather than heavy handed reliance on its secret police What is daily life like How do its parliamentary system and political parties work How free are the media What are the future prospects of this buffer state without a nation **Jordan - a Country Study** United States. Building Regional Security in the Middle East Emily B. Landau,Tamar Malz,Zeev Maoz,2004-11-23 Discussions on regional security were initiated in the Middle East in 1992 as part of the Middle East peace process The collapse of the Oslo process and other regional developments in the latter half of the 1990s have diminished hopes that the initial gains made in this direction might further develop as violence has again become the primary mode of effecting political changes in the region On the backdrop of this somewhat dismal current reality in the Middle East the rationale for this volume is that research into regional security structures should nevertheless be pursued When looking at the long term process of creating regional security setbacks are not unlikely The articles that make up this collection focus on the problems that have been encountered and possible directions for getting regional efforts back on track A special issue of the Journal of Strategic Studies **The Near East since the First World War** Malcolm Yapp,2014-10-17 This clear balanced and authoritative survey of the history of the region is now fully up to date again The text contains a general regional introduction followed by a series of country by country analyses and a section which places the Near East in the international context Professor Yapp s new edition covers recent dramatic events including the end of the Cold War the Kuwayt Crisis of 1990 91 and the continuing conflict in Israel as well as assessing the huge social and economic changes in the region It will be essential reading for

The Political Economy of Market Reform in Jordan Timothy J. Piro,1998 This volume moves beyond traditional studies of Jordan s politics to explore the interplay between politics and economy Examining the phenomenon of market reform in the developing world Timothy J Piro assesses the state s contradictory impulses toward privatization and continued state intervention in the economy Drawing on a wealth of primary materials the author illuminates the kingdom s unique politics and argues that market reform is dependent on domestic rather than international political structures

The Political Economy of Energy Subsidy Reform Gabriela Inchauste,David G. Victor,2017-03-22 This book proposes a simple framework for understanding the political economy of subsidy reform and applies it to four in depth country studies covering more than 30 distinct episodes of reform Five key lessons emerge First energy subsidies often follow a life cycle beginning as a way to stabilize prices and reduce exposure to price volatility for low income consumers However as they grow in size and political power they become entrenched Second subsidy reform strategies vary because the underlying political economy problems vary When benefits are concentrated satisfying or isolating interest groups with alternative policies is an important condition for effective reform When benefits are diffuse it can be much harder to identify and manage the political coalition needed for reform Third governments vary in their administrative and political capacities to implement difficult energy subsidy reforms Fourth improvements in social protection systems are often critical to the success of reforms because they make it possible to target assistance to those most in need Finally the most interesting cases involve governments that take a strategic approach to the challenges of political economy In these settings fixing energy subsidies is central to the governments missions of retaining political power and reorganizing how the government delivers benefits to the population These cases are examples of reform

engineering where governments actively seek to create the capacity to implement alternative policies depoliticize tariffs and build credibility around alternative policies The most successful reforms involve active efforts by policy leaders to identify the political forces supporting energy subsidies and redirect or inoculate them
