

NARRATIVE: REFLECTIONS ON A NEW OLD HISTORY

HISTORIANS HAVE ALWAYS TOLD STORIES. FROM THUCYDIDES AND Tacitus to Gibbon and Macaulay the composition of narrative in lively and elegant prose was always accounted their highest ambition. History was regarded as a branch of rhetoric. For the last fifty years, however, this story-telling function has fallen into ill repute among those who have regarded themselves as in the vanguard of the profession, the practitioners of the so-called "new history" of the post-Second-World-War era.¹ In France story-telling was dismissed as "*l'histoire événementielle*". Now, however, I detect evidence of an undercurrent which is sucking many prominent "new historians" back again into some form of narrative.

Before embarking upon an examination of the evidence for such a shift and upon some speculations about what may have caused it, a number of things had better be made clear. The first is what is meant here by "narrative".² Narrative is taken to mean the organization of material in a chronologically sequential order and the focusing of the content into a single coherent story, albeit with sub-plots. The two essential ways in which narrative history differs from structural history is that its arrangement is descriptive rather than analytical and that its central focus is on man not circumstances. It therefore

Journal of Narrative and Life History Tamar Liebes, 1994 Traditionally communication research regarded mass media content as strictly divided between fact and fiction On the one hand there were the serious genres of reality oriented news and current affairs and on the other hand entertainment genres oriented to lighthearted escape into fantasy stories Recently however scholars have come to believe that news coverage is also a kind of storytelling Whether scholarship is only following developments in the profession or foreseeing the trend the product of the increasing commercialism of conglomerate ownership journalism is increasingly concerned with entertaining that is with telling a good story At the same time entertainment is co-opting the reporting of real life Paying attention to this ongoing interaction of genres this special issue raises questions about the implications of narrativity for the functions of Western journalism demonstrates that present day questions about the implications of narrativity for objective reporting already were central to the relationship between leaders and public in ancient time asks how story forms affect the public's right to know and the role of journalism in providing a forum in which multiple points of view are given voice questions whether narrative presentation narrows the opportunity to construct an oppositional view to provide the type of information that questions the establishment and its story and is concerned with the dramatic elements in press and television news *Small Stories, Interaction and Identities* Alexandra Georgakopoulou, 2007 Narrative research is frequently described as a diverse enterprise yet the kinds of narrative data that it bases itself on present a striking consensus they tend to be autobiographical and elicited in interviews This book sets out to carve out a space alongside this narrative canon for stories that have not made it to the mainstream of narrative and identity analysis yet they abound as well as being crucial sites of subjectivity in everyday interactional contexts By

labelling those stories as small the book emphasizes their distinctiveness both interactionally and as an antidote to the tradition of grand narratives research Drawing primarily on the audio recorded small stories of a group of female adolescents that was studied ethnographically in a town in Greece the book follows a language focused and practice based approach in order to provide fresh answers and perspectives on some of the perennial questions of narrative analysis How can we re conceptualize the mainstay concepts of tellership structure and evaluation in small stories How do the participants telling identities connect with their larger social identities Finally what does the project of storying self and other mean in small stories and how can it be best explored

Biography and Turning Points in Europe and America Karla B. Hackstaff, Feiwel Kupferberg, Catherine Négroni, 2012 This sociological collection advances the argument that the concept of a turning point expands our understanding of life experiences from a descriptive to a deeper and more abstract level of analysis It addresses the conceptual issue of what distinguishes turning points from life transitions in general and raises crucial questions about the application of turning points as a biographical research method Biography and turning points in Europe and America is all the more distinctive and significant due to its broad empirical database The anthology includes authors from ten different countries providing a number of contexts for thinking about how turning points relate to constructions of meaning shaped by globalization and by cultural and structural meanings unique to each country The book will be useful across a wide range of social sciences and particularly valuable for researchers needing a stronger theoretical base for biographical work

Storylines Elliot G. Mishler, 2009-07-01 What do we mean when we refer to our identity and how do we represent it in the stories we tell about our lives Is identity a sustained private core or does it change as circumstances and relationships shift Mishler explores these questions through analyses of in depth interviews with five craftartists *Direct Speech, Self-presentation and Communities of Practice* Sofia Lampropoulou, 2012-04-26 This book deals with speech representation in Greek adolescents storytelling and investigates how members of different communities of practice present themselves and

other characters as interactional protagonists through the stories they tell The work puts forth a dynamic approach that examines direct speech representation at the local and the broader socio cultural context in which it is embedded The concept of community of practice accounts for direct speech variation and direct speech is seen as the linguistic manifestation of shared repertoire of particular communities of practice The book combines qualitative with quantitative methods of study and brings together relevant theories of speech representation narrative analysis and self presentation

The Grammar of Autobiography Jean Quigley, 2000-05 This is the first book to bring together four distinct literatures functional linguistics child language narrative development and discursive psychology It is an outgrowth of the historical relationship between psychology and linguistics especially the post Wittgensteinian turn to language Relevant issues are situated at that interface in a way that should prove accessible to both linguists with little or no psychological knowledge and to psychologists with no linguistics background are addressed Previously there have been volumes on the theses of discursive psychology and social constructionism and volumes on the workings and theories of functional linguistics but none have attempted to link the two as natural bedfellows in this way While clearly situated within the spirit of the Berkeley school it goes beyond it by virtue of linking functional linguistics and discursive psychology and by doing this ontogenetically Overall this book is an investigation of the psycholinguistic thesis of the social construction of selfhood and the psychology of everyday life Featuring the only book length studies of the use of grammatical analysis as a research strategy in psychology it integrates issues of human development and child language in a new way It deals in careful linguistic analyses examining the role of grammatical forms in constituting context which involves an examination of their functions that are then used to highlight fundamental aspects of development The linguistic analyses are treated as a testing ground for the ideas and claims made in discursive psychology The discussion deals with many of the current issues in psychology and related disciplines including narrative morality agency and responsibility in order to show the central role of language in human functioning

The topic of bilingualism has aroused considerable interest in research on language acquisition in recent decades Researchers in various fields such as developmental psychology and psycholinguistics have investigated bilingual populations from different perspectives in order to understand better how bilingualism affects cognitive abilities like memory perception and metalinguistic awareness Telling Stories in Two Languages contributes to the general upsurge in linguistically related studies of bilingual children The book's particular and unique focus is narrative development in a bilingual and multicultural context The book is particularly important in an increasingly pluralistic and multicultural United States where there are large numbers of children from increasingly diverse cultural and linguistic backgrounds Telling stories is important in the context of language and communication development because it is often by means of this activity that children develop the skill of presenting a series of events both in speech and writing However varying concepts of literacy exist in different societies and literacy has different social and personal implications in different social and cultural contexts In our schools teachers are expected to teach what is relevant for students in the dominant cultural framework but it would benefit those teachers greatly to have an understanding of important differences in for example narrative styles of different cultures Bilingualism or even multilingualism is all around us Even in the United States where a single language is clearly predominant there are hundreds of languages spoken Speaking more than one language may not be typical but is so common in modern times that it would be senseless to ignore its many implications The study of narratives told by children in both English and Japanese that are presented in this book will provide an important point of reference for research aimed at teasing apart the relative contributions of linguistic abilities and cultural conceptions to bilingual children's narrative development **Embracing**
