it it rains more or less the whole year round but most at the equinoxes as Shown in the table on the following page The winds though some what less steady are still very determinable With an easterly tending they de ect north and south following the sun In the drier season they blow SO cold that the sun s heat is not distressing and in consequence of this and the average altitude of the plateau which is 3000 feet the general temperature Of the atmosphere is very pleasant as I found from experience for I walked every inch of the journey dressed in thick woollen clothes and slept every night between blanketsfx About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
