The Oxford Handbook of European Islam Jocelyne Cesari, 2014-10-30 For centuries Muslim countries and Europe have engaged one another through theological dialogues diplomatic missions political rivalries and power struggles In the last thirty years due in large part to globalization and migration from Islamic countries to the West what was previously an engagement across national and cultural boundaries has increasingly become an internalized encounter within Europe itself Questions of the Hijab in schools freedom of expression in the wake of the Danish Cartoon crisis and the role of Shari a have come to the forefront of contemporary European discourse *The Oxford Handbook of European Islam* is the first collection to present a comprehensive approach to the multiple and changing ways Islam has been studied across European countries Parts one to three address the state of knowledge of Islam and Muslims within a selection of European countries while presenting a critical view of the most up to date data specific to each country These chapters analyse the immigration cycles and policies related to the presence of Muslims tackling issues such as discrimination post colonial identity adaptation and assimilation The thematic chapters in parts four and five examine secularism radicalization Shari a Hijab and Islamophobia with the goal of synthesizing different national discussion into a more comparative theoretical framework The Handbook attempts to balance cutting edge assessment with the knowledge that the content itself will eventually be superseded by events Featuring eighteen newly commissioned essays by noted scholars in the field this volume will provide an excellent resource for students and scholars interested in European Studies immigration Islamic studies and the sociology of religion

What Was the Islamic Conquest of Iberia? Hussein Fancy, Alejandro García-Sanjuán, 2021-05-06 What Was the Islamic Conquest of Iberia Understanding the New Debate brings together leading scholars to offer an introduction to a

recent debate with far reaching implications for the study of history as well as our understanding of the present In the year 711 CE Islamic armies conquered the Iberian Peninsula This seemingly uncontroversial claim has in fact been questioned becoming an object of intense scholarly debate debate that has reached a fevered pitch in recent decades within Spain This volume introduces an anglophone audience to the terms and contours of this controversy from its emergence in the late nineteenth century to its contemporary recrudescence It suggests that far from an abstract discussion this dispute reveals methodological and moral questions that remain vital to the study of the distant past questions than cannot be easily resolved and have far reaching consequences for the present This volume offers novel perspectives on not only the controversy but also the latest research on the events of 711 These exemplary studies of historical literary and material cultural evidence demonstrate the promise and challenges for a new generation of scholarship The chapters in this book were originally published as a special issue of the Journal of Medieval Iberian Studies

The Muslim Brotherhood in Contemporary Egypt Mariz Tadros,2012 The Muslim Brotherhood is one of the oldest and most influential Islamist movements As the party ascends to power in Egypt it is poised to adopt a new system of governance and state society relations the effects of which are likely to extend well beyond Egypt s national borders This book examines the Brotherhood s visions and practices from its inception in 1928 up to its response to the 2011 uprising as it moves to redefine democracy along Islamic lines The book analyses the Muslim Brotherhood s position on key issues such as gender religious minorities and political plurality and critically analyses whether claims that the Brotherhood has abandoned extremism and should be engaged with as a moderate political force can be substantiated It also considers the wider political context of the

region and assesses the extent to which the Brotherhood has the potential to transform politics in the Middle East

Egypt's Identities in Conflict Girgis Naiem,2018-02-12 Egypt's lack of a common national identity is the basis for much of its internal conflict Coptic Christians have been particularly affected Once major contributors to Christian civilization their influence ended with the fifth century Council of Chalcedon and they endured persecution With the seventh century Arabization of Egypt Copts were given dhimma or protected persons status The 1919 Revolution granted them greater political participation but the 1952 Revolution ended liberal democracy and established a military regime that championed Arab identity Secular Egyptians rebelled against the Mubarak regime in 2011 yet his successor was the Muslim Brotherhood's Mohamed Morsi Egypt's first Islamist president In yet another revolution over national identity secular factions ousted Morsi in 2013 while in the chaos that followed the Copts suffered the brunt of violence
