Failed Multinational Ventures:

Failed Multinational Ventures Leon Grunberg, 1981 *The Role of Multinational Companies in the Middle East* Mamarinta P. Mababaya, 2002 This study investigated whether known economic and international business theories available in the literature are meaningful enough to explain the nature existence and role of multinational companies MNCs in the Middle East particularly Saudi Arabia Two sets of questionnaires were distributed in major cities of Saudi Arabia one set for 100 multinational managers and another for 280 multinational customers 234 questionnaires were collected 45 from multinational managers and 189 from customers This represents a total response rate of 62 percent which is adequate for this study The empirical results supported with comprehensive secondary data confirmed virtually all of the research hypotheses The study found that joint ventures are the dominant form of multinational business in Saudi Arabia both in manufacturing and service industries The core roles of MNCs in the Saudi foreign ventures are evident in the cross border value adding activities of marketing trading manufacturing consulting contracting project management insurance hotel operation and banking Likewise MNCs provide licensing franchising financing services and various auxiliary roles in the Kingdom Therefore the multinationality of a firm or a group of firms operating across national boundaries is not necessarily synonymous with international production the main subject of contemporary multinational theories The respondents generally perceived the competitiveness of MNCs operating in Saudi Arabia as a function of a number of economic management marketing technological and other variables They also perceived the contributions of MNCs to the Kingdom s socio economic developments as significant and positive The study also found that understanding Islamic values and ethics is important for MNCs In this regard the researcher looked at some objective indicators of business success and related them to selected measures of MNCs local cultural awareness and responsiveness The results indicate that the business success of multinationals operating in Saudi Arabia is positively related to their local cultural awareness and responsiveness Along this line this study covers some vital elements of Islamic culture which will help MNCs understand further the cultural needs values and sensitivities of the Saudi people and Muslims in general *Multinational Enterprises and the Law* Peter T. Muchlinski, 2007-07-12 *Multinational Enterprises and the Law* presents the only comprehensive contemporary and interdisciplinary account of the various techniques used to regulate multinational enterprises MNEs at the national regional and multilateral levels In addition it considers the effects of corporate self regulation upon the development of the legal order in this area Split into four parts the book firstly deals with the conceptual basis for MNE regulation explaining the growth of MNEs their business and legal forms the relationship between them and the effects of a globalising economy and society upon the evolution of regulatory agendas in the field Part II covers the main areas of economic regulation including the limits of national and regional jurisdiction over MNE activities controls and liberalization of entry and establishment tax and company and competition law Part III introduces the social dimension of MNE regulation covering labour rights human rights

and environmental issues and Part IV deals with the contribution of international law and organizations to MNE regulation and to the control of investment risks covering the main provisions found in international investment agreements and their recent interpretation by international tribunals *The SAGE Handbook of International Marketing* Masaaki

Kotabe, Kristiaan Helsen, 2009-01-30 In an internationally minded and detailed analysis the contributors seek to examine the state of the art in research in international marketing with particular emphasis on the conceptual framework and theory development in the field Looking at new research formative and fundamental literature and the nature of strategic alliance and global strategy this timely and comprehensive Handbook offers the reader a compelling examination of the central concerns of marketing for an international community *Rival States, Rival Firms* John M. Stopford, Susan Strange, John S.

Henley, 1991-10-17 In this theoretically original work two distinguished authors explore the mutual interdependence of states and firms throughout the world They show how global structural changes in finance technology knowledge and politics often impel governments to seek the help and cooperation of managers of multinational enterprises Yet as Professors Stopford and Strange demonstrate this is constrained by each country's economic resources its social structures and its political history Based on grass roots research into the experience of over 50 multinationals and more than 100 investment projects in three developing countries Brazil Malaysia and Kenya the authors develop a matrix of agendas They present the impact on projects of the multiple factors affecting the bargaining relationships between the government and the foreign firm at different times and in a variety of economic sectors In conclusion they offer some guidelines for actions to both governments and firms and some points to future interdisciplinary research **Handbook of International Trade** Michael Z Brooke, Peter J

International Business Success in a Strange Cultural Environment Mamarinta P. Mababaya, 2003 The book focuses on the cultural aspect of the author's published PhD thesis entitled The Role of Multinational Companies in the Middle East The Case of Saudi Arabia which he has carried out at the University of Westminster It explores the success of multinational enterprises doing business in Saudi Arabia vis vis their cultural awareness and responsiveness The empirical findings discussed in this book reveal that international business success in a strange cultural environment depends partly on the ability of multinational managers to understand the local culture The cultural subject in this book pertains to Islam in its entirety The findings may seem strange to many readers who are not familiar with Islamic culture in its purest form Many newcomers to Saudi Arabia especially non Muslim foreign investors businessmen and workers often find many things strange about the Kingdom its people and cultural values Some feel it odd that many Muslims give more importance to prayer than business Some are disappointed when they find commercial establishments like shopping centres closed as Muslim workers go to the mosques to attend to their daily prayers Business visitors find strange the fact that in the midst of their meetings with their Saudi or Muslim counterparts the latter excuse themselves for prayer They have these strange feelings due to their lack of understanding of true Islamic culture The cultural aspect of this book will help businessmen and concerned institutions worldwide gain understanding of Islam and reconcile their cultural differences with the Muslim world Through this book international companies will be able to have a better understanding of authentic Islamic culture which will help them gain greater competitive advantages in the Saudi marketplace

International Business Operations and the Impact of Political Environment Rashid Saber,2006-04-24 This study attempts to develop a conceptual frame work to deal with operations and management in a foreign business environment The study develops a measure for business financial performance by employing factor analysis methods to integrate three profit related ratios derived from Modified DuPont Model utilizing financial performance data from 630 multinational companies

ranked in Business Week's Global 1000 report between years 1994-1997. In the analysis of multinational companies' cases, approximately 400 sets of financial data (Return Assets, Return Revenues, Return Equity) were categorized and computed for intercorrelations and development of the financial performance index. A new financial performance measure was derived and termed the Financial Performance Index or FPI. Indices trends for 4 years were generated and compared among four parent countries: France, Germany, Japan, and U.S. across four selected industry groups: i.e. automobile, pharmaceuticals, electric and electronic equipments, and banking. In the analysis of the multinational companies' data, the financial performance index exhibited patterns and trends which varied by country and across industry groups; moreover, they added analytical depth when interpreted along with market shares and sales mode. To test the hypothesis that a multinational company's financial performance in foreign business environment is linearly related to the host country's political conditions, twelve political uncertainties indicators (independent variable) in thirteen host countries were chosen to test for linear relationship with the level of financial performance index (dependent variables). Five equations were formulated to predict the Financial Performance Indices of the four selected industries and the country composite. A step-wise method of multiple regression analysis was employed to measure and determine a predication equation with most favorable financial performance in thirteen host countries of four major industries: i.e. automobile, pharmaceuticals, electric and electronic equipments, and banking. The combination of political risk indicators in the host country can explain the variations of the country composite FPI and the FPI across four selected industries. Results of multiple regression analysis support the hypothesis enabling prediction of the FPI as well as analysis of the differential importance of the political risk indicators. A model of international business operations was fully developed to be applied as a conceptual framework for further research and practical applications in the field of international business operations.
