## **Fair Shares:**

**Sovereign Virtue** Ronald Dworkin, 2002-03-01 Dworkin argues that equality freedom and individual responsibility are not in conflict but flow from and into one another as facets of the same humanist conception of life and politics He applies his principles to contemporary controversies such as the distribution of health care affirmative action assisted suicide and genetic engineering

**Fair Shares** Jonathan Charkham, Anne Simpson, 1999-05-27 This is a book about shareholders who they are what they own how their composition and character has changed and with it their relationship with the companies they own It is also a book about shareholder rights and responsibilities In a clear and readable style the book explores the key current corporate governance issues company law and reporting chief executive pay regulatory and accountability requirements against the background of an ever changing business environment an environment in which private investors may have grown in number but in which shareholders influence has dwindled as institutions have become the dominant shareholding group Throughout the book the authors provide numerous examples and anecdotes illustrating the evolution of the joint stock company from the South Sea Company of the 18th century to the giants and cause celebres on the corporate stage in the 1980s and 1990s Both authors are authoritative and informed commentators on issues of corporate governance with extensive management policy and advocacy experience their underlying concern is to show the importance of shareholder interest and involvement which they strongly believe will remain in the best interests of the company and the wider society in the 21st century

**Reciprocity**

**(Routledge Revivals)** Lawrence C. Becker, 2014-06-17 The tendency to reciprocate to return good for good and evil for evil is a potent force in human life and the concept of reciprocity is closely connected to fundamental notions of justice obligation

or duty gratitude and equality In Reciprocity first published in 1986 Lawrence Becker presents a sustained argument about reciprocity beginning with the strategy for developing a moral theory of the virtues He considers the concept of reciprocity in detail contending that it is a basic virtue that provides the basis for parental authority obligations to future generations and obedience to law Throughout the first two parts of the book Becker intersperses short pieces of his own narrative fiction to enrich reflection on the philosophical arguments The final part is devoted to extensive bibliographical essays ranging over anthropology psychology political theory and law as well as the relevant ethics and political philosophy *Housing and Urban Development Act of 1965* United States. Congress. House. Committee on Banking and Currency. Subcommittee on Housing,1965 **Hearings** United States. Congress. House. Committee on Banking and Currency,1965 **April 1, 2, 5, 6, and 7, 1965** United States. Congress. House. Committee on Banking and Currency. Subcommittee on Housing,1965 *The Ethics of Legal Coercion* J.D. Hodson,2012-12-06 Are all of the commonly accepted aims of the use of law justifiable Which kinds of behavior are justifiably prohibited which kinds justifiably required What uses of law are not defensible How can the legitimacy or the illegitimacy of various uses of law be explained or accounted for These are questions the answering of which involves one in many issues of moral principle for the answers require that one adopt positions even if only implicitly on further questions of what kinds of actions or policies are morally or ethically acceptable The present work aimed at questions of these kinds is thus a study in the ethical evaluation of major uses of legal coercion It is an attempt to provide a framework within which many questions about the proper uses of law may be fruitfully discussed The framework if successful can be used by anyone asking questions about the defensibility of particular or general uses of law whether from the perspective of someone considering whether to bring about some new legal provision from the perspective of someone concerned to evaluate an existing provision or from that of someone concerned more abstractly with questions about the appropriate substance of an ideal legal system In addressing these and associated issues I shall be exploring the extent to which an ethics based on respect for persons and their autonomy can handle satisfactorily the problems arising here

Challenging Health Economics Gavin Mooney,2009-01-22 This book mounts a critique of current health economics and provides a better way of looking at the economics of health and health care It argues that health economics has been too dominated by the economics of health care and has largely ignored the impact of poverty inequality poor housing and lack of education on health It is suggested that some of the structural issues of economies particularly the individualism of neo liberalism which is becoming more and more pervasive across the globe need to be addressed in health economics The author instead proposes a form of collective decision making through communitarianism placing value on participation in public life and on institutions such as health care It is envisaged this form of decision making can be used at the local national or global levels For the last this would mean a major revamp of global institutions like the World Bank and the IMF Examples of the impact of the new paradigm on health policy in general but also more specifically on priority setting and

equity are included      **Distributive Justice and Access to Advantage** Alexander Kaufman, 2015 Major scholars assess G A Cohen's contribution to the debate on the nature of egalitarian justice      **Political Argument (Routledge Revivals)** Brian M. Barry, 2011 Since its publication in 1965 Brian Barry's seminal work has occupied an important role in the revival of Anglo American political philosophy A number of ideas and terms in it have become part of the standard vocabulary such as the distinction between ideal regarding and want regarding principles and the division of principles into aggregative and distributive The book provided the first precise analysis of the concept of political values having trade off relations and its analysis of the notion of the public interest has also been significant      Proportionate Share Impact Fees and Development Mitigation Arthur C. Nelson, James C. Nicholas, Julian Conrad Juergensmeyer, Clancy Mullen, 2022-11-30 After decades of evolving practice often tested in court development impact fees have become institutionalized in the American planning and local government finance systems But they remain contentious especially as they continue to evolve This book is the third in a series of impact fee guidebooks for practitioners following A Practitioner's Guide to Development Impact Fees and Impact Fees Proportionate Share Development Fees Proportionate Share Impact Fees and Development Mitigation is the culmination of the authors' careers devoted to pioneering applications of the dual rational nexus test That test requires 1 establishing the rational nexus between the need for infrastructure broadly defined to mitigate the impacts of development and 2 ensuring that development mitigating its infrastructure impacts benefits proportionately The book elevates professional practice in two ways First it shows how the rational nexus test can be applied to all forms of development infrastructure impact mitigation Second it establishes the link between professional ethics and equity as applied to proportionate share impact fees and development mitigation The book is divided into four parts with the first reviewing policy and legal foundations the second detailing the planning calculation and implementation requirements the third exploring economic ethical and equity implications and the fourth presenting state of the art case studies Proportionate Share Impact Fees and Development Mitigation sets new standards for professional practice      **Status of U.S. Participation in the International Energy Agency's Emergency Sharing System** United States. General Accounting Office, 1985      *Targeting Maths* Judy Tertini, Katy Pike, 2004      **Controlling Costs: Strategic Issues in Health Care Management** Huw T.O. Davies, Manouche Tavakoli, 2017-03-02 Controlling costs in health care is rarely something that can be tackled in isolation Cost control invariably interacts with issues of quality and health care access Thus this diverse collection of papers is concerned not just with costs but more importantly with value Both macro and micro concerns are covered At the macro level health care reforms and especially the marketisation of health care systems receive some attention Papers explore how policy prescriptions get translated and modified during implementation and assess how these prescriptions impact on both the incentive context and subsequent patterns of service delivery Resource allocation within bureaucratic health systems continues to pose problems and these too are analysed with new solutions being proposed At the

micro level a number of contributors wrestle with the difficulties of carrying out the economic evaluation of new drugs and technologies In each case the wider theoretical and practical implications of balancing costs and benefits are explored This collection should prove helpful to health care policy specialists managers and researchers interested in gaining a feel for the real world application of cost focused health services research

**Distributional Cost-Effectiveness Analysis** Richard Cookson, Susan Griffin, Ole F. Norheim, Anthony J. Culyer, 2020-09-30 Distributional cost effectiveness analysis aims to help health care and public health organisations make fairer decisions with better outcomes Whereas standard cost effectiveness analysis provides information about total costs and effects distributional cost effectiveness analysis provides additional information about fairness in the distribution of costs and effects who gains who loses and by how much It can also provide information about the trade offs that sometimes occur between efficiency objectives such as improving total health and equity objectives such as reducing unfair inequality in health This is a practical guide to a flexible suite of economic methods for quantifying the equity consequences of health programmes in high middle and low income countries The methods can be tailored and combined in various ways to provide useful information to different decision makers in different countries with different distributional equity concerns The handbook is primarily aimed at postgraduate students and analysts specialising in cost effectiveness analysis but is also accessible to a broader audience of health sector academics practitioners managers policymakers and stakeholders As well as offering an overview for research commissioners users and producers the book includes systematic technical guidance on how to simulate and evaluate distributions with accompanying hands on spreadsheet training exercises and discussions about how to handle uncertainty about facts and disagreement about values and the future challenges facing this young and rapidly evolving field of study
