Linguistic Evolution through Language Acquisition Ted Briscoe,2002-08-08 This is a study of how children acquire language and how this affects language change over generations Written by an international team of experts the volume proceeds from the basis that we can not only address the language faculty per se within the framework of evolutionary theory but also the origins and subsequent development of languages themselves languages evolve via cultural rather than biological transmission on a historical rather than genetic timescale The book is distinctive in utilizing computational simulation and modelling to help ensure the theories constructed are complete and precise Drawing on a wide range of examples the book covers the why and how of specific syntactic universals the nature of syntactic change the language learning mechanisms required to acquire an existing linguistic system accurately and to impose further structure on an emerging system and the evolution of language s in relation to this learning mechanism , **The Congregational**

conversation with the rich literature on trust itself This volume aims to promote and shape this conversation It encourages epistemologists of all stripes to dig deeper into the fundamental epistemic roles played by trust and it encourages philosophers of trust to explore the epistemological upshots and applications of their theories The contributors explore such issues as the risks and necessity of trusting others for information the value of doing so as opposed to relying on oneself the mechanisms underlying trust s strange ability to deliver knowledge whether depending on others for information is compatible with epistemic responsibility whether self trust is an intellectual virtue and the intimate relationship between epistemic trust and social power This volume in Routledge s new series on trust research will be a vital resource to academics and students not just of epistemology and trust but also of moral psychology political philosophy the philosophy of science and feminist philosophy and to anyone else wanting to understand our vital yet vulnerable making capacity to trust others and ourselves for information in a complex world     *McNair, McNear, and McNeir Genealogies* James Birtley
