Facts Possibilities:

Hyperreality Mike Hockney, 2013-07-28 What is time Scientists know how to measure time but they have no idea what it actually is This books explains the deep mystery of time It clarifies all of the enigmas concerning the tensed and tenseless theories of time and addresses McTaggart s famous claim that time is unreal Hegel s classification of good and bad infinity is analyzed and a new mathematics of infinity is introduced based on the concept of the finite infinite as opposed to the infinite infinite The correct answer is given to Zeno s notoriously problematic paradox of the race between Achilles and the tortoise The Hotel Infinity model of the Big Bang is analyzed and shown to be far superior to conventional Big Bang theory The Sensorium and Cognitorium are discussed and multiple accounts of consciousness including dream consciousness and Jungian archetypes The issue of private language is analyzed and used as a proof for the non existence of the Abrahamic God

Things, Facts and Events ,2022-04-19 The volume deals with ontological and semantical issues concerning things facts and events Ontology tells us about what there is whereas semantics provides answers to how we refer to what there is Basic ontological categories are commonly accepted along with basic linguistic types and linguistic types are accepted as basic if and because they refer to acknowledged ontological categories In that sense both disciplines are concerned with structure the structure of the world and the structure of our language An extended introduction overviews the topic as a whole presenting in detail its history and the main contemporary approaches and discussions More than 20 contributions by internationally acknowledged scholars make the volume a comprehensive study of some very fundamental philosophical entities

Causalism Carolina Sartorio, 2023 Carolina Sartorio argues for a naturalistic conception of agency and free agency that unifies them under the thesis that actions free actions are behaviors that have the right kinds of causes or explanations The result is a compelling view of practical agency taking in key metaphysical notions such as causation grounding absences and powers

Private Fleming at Chancellorsville Perry Lentz, 2006 What intelligent person has never pondered the meaning of life For Yuval Lurie this is more than a puzzling philosophical question it is a journey and in this book he takes readers on a search that ranges from ancient quests for the purpose of life to the ruminations of postmodern thinkers on meaning He shows that the question about the meaning of life expresses philosophical puzzlement regarding life in general as well as personal concern about one s own life in particular Lurie traces the emergence of this question as a modern philosophical quandary riddled with shifts and turns that have arisen over the years in response to it Tracking the Meaning of Life is written as a critical philosophical investigation stretching over several traditions such as analytic philosophy phenomenology and existentialism It maps out a journey that explores pivotal responses to this question drawing especially on the thought of Tolstoy Wittgenstein Sartre and Camus and exploring in depth the insights these thinkers offer regarding their own difficulties concerning the meaning of life In the book s four sections Lurie discusses Tolstoy s challenge to experience the religious and transcendental meaning of life by choosing a simple hardworking

existence Wittgenstein's focus on ethics and discovering the sense of the world his conclusion that the question of the meaning of life makes no sense and his turning to experience the mystical aspect of the world Sartre's positing of freedom as the basis of human life stipulating a personal answer to the question of the meaning of life and Camus' view of the absurdity of life unalleviated by any personal meaning Guided by these views Lurie imparts new insight to ideas that underlie our concern with life's meaning such as the difference between attitudes toward life and beliefs and opinions about life the meaning of words versus the meaning of events shared meanings versus personal meanings and the link between ethics and personal identity Tracking the Meaning of Life is no mere dry philosophical study but a journey that dramatically illustrates the poignancy of the quest for meaning showing that along the way it gradually becomes more obvious how personal meaning may be found in the pulsations of everyday life The book offers stimulating reading not only for scholars in philosophy but also for general readers who wish to see how their personal concerns are echoed in modern philosophical thought More than a description of a journey it is a map to anxieties and puzzlements we all face pointing to ideas that can guide readers on their own search for meaning

Handbook of Imagination and Mental Simulation Keith D. Markman, William M. P. Klein, Julie A. Suhr, 2012-09-10 Over the past thirty years and particularly within the last ten years researchers in the areas of social psychology cognitive psychology clinical psychology and neuroscience have been examining fascinating questions regarding the nature of imagination and mental simulation the imagination and generation of alternative realities Some of these researchers have focused on the specific processes that occur in the brain when an individual is mentally simulating an action or forming a mental image whereas others have focused on the consequences of mental simulation processes for affect cognition motivation and behavior This Handbook provides a novel and stimulating integration of work on imagination and mental simulation from a variety of perspectives It is the first broad based volume to integrate specific sub areas such as mental imagery imagination thought flow narrative transportation fantasizing and counterfactual thinking which have until now been treated by researchers as disparate and orthogonal lines of inquiry As such the volume enlightens psychologists to the notion that a wide range of mental simulation phenomena may actually share a commonality of underlying processes

Tractatus Logico-Philosophicus Ludwig Wittgenstein, 2014-05-12 Ludwig Wittgenstein's *Tractatus Logico Philosophicus* is among the most ambitious and

influential philosophical works of the early twentieth century and in recent years it has again occupied a central position in discussions of Wittgenstein's philosophy. Written in an austere and meticulous style, the *Tractatus* addresses questions in the philosophy of language, logic, and metaphysics, and according to its author, provides a solution to all the problems of philosophy. This Broadview Edition contains the original English translation by C. K. Ogden and Frank P. Ramsey, annotated and revised by the editor for improved accuracy and clarity. Appendices include important material by Gottlob Frege and Bertrand Russell, as well as excerpts from Wittgenstein's other writings.

From Zeno to Arbitrage Brian Skyrms, 2012-11-29
 Brian Skyrms presents a set of influential essays which deploy formal methods to address epistemological and metaphysical questions. The first part of the book focuses on quantity, the second on degrees of belief, belief revision, and coherence, the third on aspects of inductive reasoning.

Singularity and Other Possibilities Amihud Gilead, 2021-11-08
 This book elaborates the author's original metaphysics, panenmentalism, focusing on novel aspects of the singularity of any person. Among these aspects integrated in a systematic view are love and singularity, private intersubjective and public accessibility, multiple personality, freedom of will, akrasia, a way out of the empiricist/rationalist conundrum, the possibility of God, and some major moral questions.

Unstructured Content, 2025-01-06
 The original essays in this volume present cutting-edge research on unstructured theories of propositional content. Unstructured theories have traditionally played a central role in linguistics, especially formal semantics, and both the philosophy of language and philosophy of mind. The volume explores a wide range of themes related to unstructured content, such as the continued controversy over whether unstructured theories individuate contents too coarsely compared to other theories of propositional content, and applications of unstructured theories to various topics. Topics to which unstructured theories are applied include rationality, epistemic commitment, semantic expressivism, relevance, and attitude ascriptions. Theories of unstructured content discussed include traditional theories according to which propositions are sets of worlds, as well as contemporary theories such as truthmaker semantics. The volume contains contributions from different theoretical perspectives, including perspectives sympathetic to unstructured theories of content, and perspectives that are skeptical, as well as perspectives from different methodological backgrounds, with philosophy, logic, and linguistics all represented. With contributions from leading scholars in philosophy and linguistics, this volume will be required reading for anyone working on the nature of propositional content. It will also be of interest to those working on related issues in logic, metaphysics, and the philosophy of mind.

Records of the Proceedings and Printed Papers of the Parliament Australia. Parliament, 1929
Signs of Sense Eli FRIEDLANDER, Eli Friedlander, 2009-06-30
 This work seeks to shed light on one of the most enigmatic masterpieces of twentieth-century thought. At the heart of Eli Friedlander's interpretation is the internal relation between the logical and the ethical in the *Tractatus*, a relation that emerges in the work of drawing the limits of language. Bearing on the question of the divide between analytic and Continental philosophy, this interpretation views Wittgenstein's work as a possible mediation between these two central

philosophical traditions of the modern age **Metaphysics** Josiah Royce, 1998-08-13 This book is an edited transcript of Josiah Royce's last year long course in metaphysics at Harvard in 1915-1916 **Toward A Sociological Theory of Information** Harold Garfinkel, Anne Rawls, 2015-11-17 In 1952 at Princeton University Harold Garfinkel developed a sociological theory of information. Other prominent theories then being worked out at Princeton including game theory neglected the social elements of information modeling a rational individual whose success depends on completeness of both reason and information. In real life these conditions are not possible and these approaches therefore have always had limited and problematic practical application. Garfinkel's sociological theory treats information as a thoroughly organized social phenomenon in a way that addresses these shortcomings comprehensively. Although famous as a sociologist of everyday life, Garfinkel focuses in this new book, never before published, on the concerns of large scale organization and decisionmaking. In the fifty years since Garfinkel wrote this treatise there has been no systematic treatment of the problems and issues he raises. Nor has anyone proposed a theory of information like the one he proposed. Many of the same problems that troubled theorists of information and predictable order in 1952 are still problematic today **ECRM 2018 17th European Conference on Research Methods in Business and Management** Prof. Michela Marchiori, 2018-07-12 These proceedings represent the work of researchers participating in the 17th European Conference on Research Methodology for Business and Management Studies ECRM which is being hosted this year by Universit Roma TRE Rome Italy on 12-13 July 2018 **Homo Interrogans** John Bruin, 2001-02-22 Emerging from the Brentano-Husserl tradition, this volume charts new ground in the conceptual discourse of questioning and answering. John Bruin examines the logic of interrogation and makes the case that intentionality itself has the structure of question and answer. Here he breaks rank with the better known and more traditional and sets out to explore questioning from a phenomenological perspective **Possible Worlds** John Divers, 2006-01-16 Up to date and comprehensive study of a major topic in philosophy. The first critical account of forty years of literature on possible worlds. A huge topic in analytic philosophy especially in the past twenty five years and one of the major problems in philosophy as a whole. This is the only book available that will introduce the topic to students in philosophy. John Divers has taught possible worlds for many years **Belief in God** T. J. Mawson, 2005 Belief in God answers two questions: what if anything is it that Jews, Christians and Muslims are agreeing about when they join in claiming that there is a God, and what if any prospects are there for rationally defending or attacking this claim. In the context of a sustained argument for particular answers to these questions, Tim Mawson tackles many of the most prominent topics in the philosophy of religion. He argues that those who believe that there is a God are best interpreted as believing that there is a being who is essentially personal, transcendent, immanent, omnipotent, omniscient, eternal, perfectly free, perfectly good and necessary, and non-essentially creator of the world and value-revealer of Himself and offerer of everlasting life. Having explored the meaning and consistency of this conception of God in the first half of the book, Mawson goes on to consider whether or not belief or the absence of belief in such a God

might be the sort of thing that does not rationally require argument and if not what the criteria for a good argument for or against such a God's existence might be
