## **Fair Shares The Future Of Shareholder Power And Responsibility:**

**Fair Shares** Jonathan P. Charkham, Anne Simpson, 1999 Charkham and Simpson discuss shareholders who they are what they own how their character has changed and with it their relationship with the companies they own their shareholder rights and their responsibilities *FAIR SHARES: THE FUTURE OF SHAREHOLDER POWER AND RESPONSIBILITY.*

Jonathan P. Charkham, **Fair Shares** Jonathan Charkham, Anne Simpson, 1999-05-27 This is a book about shareholders who they are what they own how their composition and character has changed and with it their relationship with the companies they own It is also a book about shareholder rights and responsibilities In a clear and readable style the book explores the key current corporate governance issues company law and reporting chief executive pay regulatory and accountability requirements against the background of an ever changing business environment an environment in which private investors may have grown in number but in which shareholders influence has dwindled as institutions have become the dominant shareholding group Throughout the book the authors provide numerous examples and anecdotes illustrating the evolution of the joint stock company from the South Sea Company of the 18th century to the giants and cause celebres on the corporate stage in the 1980s and 1990s Both authors are authoritative and informed commentators on issues of corporate governance with extensive management policy and advocacy experience their underlying concern is to show the importance of shareholder interest and involvement which they strongly believe will remain in the best interests of the company and the wider society in the 21st century **The Constitutional Corporation** Stephen Bottomley, 2016-03-23 Corporate laws are based on the idea that the interests of shareholders should be the primary concern of company directors However some argue that the proper role for shareholders is to sit back and let the corporation's managers do their job or that the pursuit of shareholders interests detracts from the concerns of employees or victims of corporate wrongdoing or other stakeholders Stephen Bottomley argues that instead of consigning shareholders to this passive role they should be given opportunities to be active members of corporations Corporations are constitutional arrangements rather than mere contractual agreements They are decision making organizations in which questions of process and structure are important Thus instead of using economic criteria such as efficiency as the sole measure for deciding what constitutes good corporate governance this book examines whether ideas of accountability deliberation and contestability provide a valuable framework for assessing corporate structures and process and for encouraging greater shareholder participation **Blockchain Technology in**

**Project Finance** Witold Srokosz, Paweł Lenio, Grzegorz Sobiecki, 2025-01-31 There is currently no comprehensive scientific study that addresses the problem of financing projects using Distributed Ledger blockchain Technology DLT that are not themselves embedded in the blockchain ecosystem particularly in the context of long term and capital intensive investments This book fills this gap It poses a number of research questions such as what financing model mechanism is the most effective in the long term where very large financial resources are concerned are there appropriate legal regulations in place

and can DLT blockchain technology provide usability and solutions that can be used in the process of financing capital intensive investments The book ultimately shows that it is possible to build a legal and economic model that would effectively enable the financing of long term and capital intensive investments based on a specially prepared integrated platform operating on the basis of blockchain technology As a result of the mechanisms of smart contracts the platform would enable the issuance and service of tokens including equity tokens but also auxiliary and payment or utility tokens and the automation of relations between stakeholders It would also allow the creation of a virtual decentralized autonomous organization DAO that would control the implementation of the project and a decentralized exchange that would enable token trading The core readership for the book is academics scholars and researchers in the fields of economics finance and law particularly those focused on blockchain technology distributed ledger systems and innovative financing mechanisms for large scale investments Policymakers and regulators involved in developing policies and legal frameworks for blockchain technology cryptocurrencies and financial innovation would find it to be a practical reference The Open Access version of this book available at [www.taylorfrancis.com](http://www.taylorfrancis.com) has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

### **The Quest for Professionalism** Georges

Romme,2016 Early pioneers in management thinking such as Henri Fayol and Peter Drucker conceived of management as a science based professional activity that serves the greater good Today however many organizations are managed by people demonstrating anything but professionalism resulting in mismanagement of risks as well as a one dimensional focus on short term results The key thesis in this book is that The Quest for Professionalism must be revitalized because the societal costs and damage caused by managerial amateurism are huge The book is about how to address this grand challenge for example by exploring whether and how a shared professional purpose and a professional body of knowledge can be developed While most work in this area has previously focused on management education The Quest for Professionalism adopts an inside out approach implying management scholarship is the driving force behind any intrinsic transformation of the profession at large Without management scholars playing an active role in advancing science based professionalism in the mould of engineering and medicine any attempt to professionalize management practice is doomed to fail Moreover Georges Romme demonstrates the professionalization quest has to move away from the idea of management being confined to a few people at the top toward management as a technology for distributing power and leadership throughout the organization
