California. Court of Appeal (3rd Appellate District). Records and Briefs California (State)., **Applying Language Science to Language Pedagogy** José Manuel Igoa, Montserrat Sanz, 2011-12-08 This book establishes a bridge between current research in Linguistics and Psycholinguistics and language pedagogy in the classroom It reformulates the debates about teaching approaches by calling the reader's attention to discoveries about the structure of grammar the universals of language mind processes while comprehending producing and storing language and facts about learning The popularization of L2 teaching brought with it a need to find efficient teaching methods Debates have hinged mainly around the alleged advantages of communicative vs traditional methods However most approaches have their roots in linguistic and psychological theories that have been questioned by language researchers Some language teachers are probably unaware of these advances and to that extent continue to adhere to teaching approaches mainly based on intuitions Consequently evaluating materials may be often performed in rather uninformed circumstances The book contains chapters on relevant issues by leading researchers classified into three main areas The editors contribute a chapter to each of these sections about the implications for second language teaching This book facilitates an approximation between researchers in the
