**The New American Workplace** Eileen Appelbaum, Rosemary Batt, 2018-08-06 Despite formidable obstacles a small but growing number of U S companies recognize that today's domestic and international markets require them to transform their production process On the basis of more than ten years of survey data and the evidence of case studies Eileen Appelbaum and Rosemary Batt analyze the experiences of these companies Their findings reveal two distinct and coherent models of the new American workplace One is an American version of team production which combines the principles of sociotechnical systems with those of quality engineering and which decentralizes the management of work flow and decision making The other is an American version of lean production which relies more heavily on managerial and technical expertise and on centralized coordination and decision making The authors explain the organizational models from which high performance firms in the United States have borrowed and outline the policies required to promote more widespread workplace change They contend that U S firms can in fact compete successfully while providing their workers with increased job security livable wages and enhanced job satisfaction Certain to appeal to both union and business leaders this volume also offers crucial insights to policy makers and to scholars of the new American workplace

finding is that the worker co operative members have access to more dispute resolution strategies than their conventionally employed counterparts This leads to the conclusion that benefits might be achieved by conventional businesses that wish to embrace specific attributes usually associated with co operatives including management employee cooperation shared ownership or greater workplace equality

**Transgressing Discourses** Michael Huspek,Gary P. Radford,1997-07-17 The basic theme of this volume is excellent Readers are treated to fascinating explorations of communication at the boundaries between discourses and selves The essays address important theoretical issues and do so often by treating significant social issues Most welcome is the constructive tone that is for the most part maintained throughout the volume demonstrating an effort to understand engage and critically assess different discourses and selves and others at once without valorizing one over the other An essential theme running through this volume is the idea that our efforts to engage as well as other s efforts to engage us have been seriously impaired because of problems which are fundamentally communicative in nature More specifically there is general agreement among the contributors that the voice of other has not been sufficiently heard and this on account of how discourses of the human sciences as well as other dominant discourses e g law have structured our interaction with other Each of the essays helps to clarify the nature of the communicative failing and to develop an appropriate corrective action
