Maps Relating to Virginia in the Virginia State Library and Other Departments of the Commonwealth ,1914 A Biography of a Map in Motion Christian J. Koot,2018 Reveals the little known history of one of history s most famous maps and its maker Tucked away in a near forgotten collection Virginia and Maryland as it is Planted and Inhabited is one of the most extraordinary maps of colonial British America Created by a colonial merchant planter and diplomat named Augustine Herrman the map pictures the Mid Atlantic in breathtaking detail capturing its waterways coastlines and communities Herrman spent three decades travelling between Dutch New Amsterdam and the English Chesapeake before eventually settling in Maryland and making this map Although the map has been reproduced widely the history of how it became one of the most famous images of the Chesapeake has never been told A Biography of a Map in Motion uncovers the intertwined stories of the map and its maker offering new insights into the creation of empire in North America The book follows the map from the waterways of the Chesapeake to the workshops of London where it was turned into a print and sold Transported into coffee houses private rooms and government offices Virginia and Maryland became an apparatus of empire that allowed English elites to imaginatively possess and accurately manage their Atlantic colonies Investigating this map offers the rare opportunity to recapture the complementary and occasionally conflicting forces that created the British Empire From the colonial and the metropolitan to the economic and

the political to the local and the Atlantic this is a fascinating exploration of the many meanings of a map and how what some saw as establishing a sense of local place could translate to forging an empire

Selling Empire Jonathan Eacott,2016-02-02 2017 Bentley Book Prize World History Association Linking four continents over three centuries Selling Empire demonstrates the centrality of India both as an idea and a place to the making of a global British imperial system In the seventeenth century Britain was economically politically and militarily weaker than India but Britons increasingly made use of India's strengths to build their own empire in both America

and Asia Early English colonial promoters first envisioned America as a potential India hoping that the nascent Atlantic colonies could produce Asian raw materials When this vision failed to materialize Britain s circulation of Indian manufactured goods from umbrellas to cottons to Africa Europe and America then established an empire of goods and the supposed good of empire Eacott recasts the British empire s chronology and geography by situating the development of consumer culture the American Revolution and British industrialization in the commercial intersections linking the Atlantic and Indian Oceans From the seventeenth into the nineteenth century and beyond the evolving networks ideas and fashions that bound India Britain and America shaped persisting global structures of economic and cultural interdependence
