Two Minds Roger Frantz, 2006-07-02 As everyone knows intuition is warm and fuzzy qualitative not measurable Economics on the other hand is quantitative and if it is not a hard science at least it is the queen of the social sciences It is therefore intuitively obvious that intuition and economics are as if oil and water The problem is what is intuitively obvious is not always correct And there are two major reasons why intuition and economics are not like oil and water First economics concerns itself with decision making and decisions are made in the brain The human brain is the size of a grapefruit weighing three pounds with approximately 180 billion neurons each physically independent but interacting with the other neurons What we call intuition is like decision making a natural information processing function of the brain Second despite the current emphasis on quantitative analysis and deductive logic there is a rich history of economists speaking about intuition First the human brain specifically the neocortex has a left and right hemisphere The specialized analytical style of the left hemisphere and the specialized intuitive style of the right hemispheres complement each other

John Stuart Mill on Liberty and Control Joseph Hamburger, 2001-06-18 John Stuart Mill is one of the hallowed figures of the liberal tradition revered for his defense of liberal principles and expansive personal liberty By examining Mill's arguments in *On Liberty* in light of his other writings however Joseph Hamburger reveals a Mill very different from the saint of rationalism so central to liberal thought He shows that Mill far from being an advocate of a maximum degree of liberty was an advocate of liberty and control indeed a degree of control ultimately incompatible with liberal ideals Hamburger offers this powerful challenge to conventional scholarship by presenting Mill's views on liberty in the context of his ideas about in particular religion and historical development The book draws on the whole range of Mill's philosophical writings and on his correspondence with among others Harriet Taylor Mill Auguste Comte and Alexander Bain

to show that Mill's underlying goal was to replace the traditional religious basis of society with a form of secular religion that would rest on moral authority individual restraint and social control Hamburger argues that Mill was not self contradictory in thus championing both control and liberty Rather liberty and control worked together in Mill's thought as part of a balanced coherent program of social and moral reform that was neither liberal nor authoritarian Based on a lifetime's study of nineteenth century political thought this clearly written and forcefully argued book is a major reinterpretation of Mill's ideas and intellectual legacy

In the Great Maelstrom Charles J. Holden, 2002 In the Great Maelstrom demonstrates how the state's conservatives adjusted their views at critical times while clinging to other core values through the long decades
BOOK JACKET *Why It's OK to Speak Your Mind* Hrishikesh Joshi, 2021-03-08 Political protests debates on college campuses and

social media tirades make it seem like everyone is speaking their minds today Surveys however reveal that many people increasingly feel like they're walking on eggshells when communicating in public Speaking your mind can risk relationships and professional opportunities It can alienate friends and anger colleagues Isn't it smarter to just put your head down and keep quiet about controversial topics In this book Hrishikesh Joshi offers a novel defense of speaking your mind He explains that because we are social creatures we never truly think alone What we know depends on what our community knows And by bringing our unique perspectives to bear upon public discourse we enhance our collective ability to reach the truth on a variety of important matters Speaking your mind is also important for your own sake It is essential for developing your own thinking And it's a core aspect of being intellectually courageous and independent Joshi argues that such independence is a crucial part of a well lived life The book draws from Aristotle John Stuart Mill Friedrich Nietzsche Bertrand Russell and a range of contemporary thinkers to argue that it's OK to speak your mind Key Features Shows that we have not just a right but a moral duty to publicly share what we know Argues that discussing your unique ideas with others is essential for developing as a critical thinker Explores the value of intellectual honesty and independence in the writings of John Stuart Mill and Friedrich Nietzsche and connects their thinking to contemporary problems Argues that avoiding cultural blind spots today is important for the fate of future generations

Science Serialized Geoffrey Cantor, Sally Shuttleworth, 2004-03-12 Essays examining the ways in which the Victorian periodical press presented the scientific developments of the time to general and specialized audiences Nineteenth century Britain saw an explosion of periodical literature with the publication of over 100 000 different magazines and newspapers for a growing market of eager readers The Victorian periodical press became an important medium for the dissemination of scientific ideas Every major scientific advance in the nineteenth century was trumpeted and analyzed in periodicals ranging from intellectual quarterlies such as the *Edinburgh Review* to popular weeklies like the *Mirror of Literature* from religious periodicals such as the *Evangelical Magazine* to the atheistic *Oracle of Reason* Scientific articles appeared side by side with the latest fiction or political reporting while articles on nonscientific topics and serialized novels invoked scientific theories or used analogies drawn from science The essays

collected in *Science Serialized* examine the variety of ways in which the nineteenth century periodical press represented science to both general and specialized readerships. They explore the role of scientific controversy in the press and the cultural politics of publication. Subject range from the presentation of botany in women's magazines to the highly public dispute between Darwin and Samuel Butler and from discussions of the mind/body problem to those of energy/physics. Contributors include leading scholars in the fields of history of science and literature: Ann B. Shteir, Jonathan Topham, Frank A. J. L. James, Roger Smith, Graeme Gooday, Crosbie Smith, Ian Higginson, Gillian Beer, Bernard Lightman, Helen Small, Gowan Dawson, Jonathan Smith, James G. Paradis, and Harriet Ritvo. Nineteenth-century Literature Criticism Laurie Lanzen Harris, 1981. Excerpts from criticism of the works of novelists, poets, playwrights, short story writers, and other creative writers who lived between 1800 and 1900, from the first published critical appraisals to current evaluations. *Subject Catalog* Library of Congress, Making Up Our Mind Sigal R. Ben-Porath, Michael C. Johanek, 2019-04-24. If free market advocates had total control over education policy, would the shared public system of education collapse? Would school choice revitalize schooling with its innovative force? With proliferating charters and voucher schemes, would the United States finally make a dramatic break with its past and expand parental choice? Those are not only the wrong questions, they're the wrong premises, argue philosopher Sigal R. Ben-Porath and historian Michael C. Johanek in *Making Up Our Mind*. Market-driven school choices aren't new. They predate the republic, and for generations, parents have chosen to educate their children through an evolving mix of publicly supported, private, charitable, and entrepreneurial enterprises. The question is not whether to have school choice. It is how we will regulate who has which choices in our mixed market for schooling, and what we as a nation hope to accomplish with that mix of choices. Looking beyond the simplistic divide between those who oppose government intervention and those who support public education, the authors make the case for a structured landscape of choice in schooling, one that protects the interests of children and of society while also identifying key shared values on which a broadly acceptable policy could rest. **The Philosopher's Index**, 1978
