Nature Writing Don Scheese, 2013-10-28 In this comprehensive study of the genre Don Scheese traces its evolution from the pastoralism evident in the natural history observations of Aristotle and the poetry of Virgil to current American writers He documents the emergence of the modern form of nature writing as a reaction to industrialization Scheese's personal observations of natural settings sharpen the reader's understanding of the dynamics between author and locale His study is further informed by ample use of illustrations and close readings core writers such as Thoreau John Muir and Mary Austin showing how each writer's work exemplifies the pastoral tradition and celebrate a spirit of place in the United States

The Writings of John Muir John Muir, 1915 Power and the Pursuit of Peace: Theory and Practice in the History of Relations Between States F. H. Hinsley, Francis Harry Hinsley, 1967-10 In the last years of the nineteenth century peace proposals were first stimulated by fear of the danger of war rather than in consequence of its outbreak In this study of the nature and history of international relations Mr Hinsley presents his conclusions about the causes of war and the development of men's efforts to avoid it In the first part he examines international theories from the end of the middle ages to the establishment of the League of Nations in their historical setting This enables him to show how far modern peace proposals are merely copies or elaborations of earlier schemes He believes there has been a marked reluctance to test these theories not only against the formidable criticisms of men like Rousseau Kant and Bentham but also against what we have learned about the nature of international relations and the history of the practice of states This leads him to the second part of his study an analysis of the origins of the modern states system and of its evolution between the eighteenth century and the First World War

Stewart, 2012-07-11 *A Natural History of Nature Writing* is a penetrating overview of the origins and development of a uniquely American literature. Essayist and poet Frank Stewart describes in rich and compelling prose the lives and works of the most prominent American nature writers of the 19th and 20th centuries including Henry D. Thoreau, the father of American nature writing; John Burroughs, a schoolteacher and failed businessman who found his calling as a writer and elevated the nature essay to a loved and respected literary form; John Muir, founder of Sierra Club who celebrated the wilderness of the Far West as few before him; Aldo Leopold, a Forest Service employee and scholar who extended our moral responsibility to include all animals and plants; Rachel Carson, a scientist who raised the consciousness of the nation by revealing the catastrophic effects of human intervention on the Earth's living systems; Edward Abbey, an outspoken activist who charted the boundaries of ecological responsibility and pushed these boundaries to political extremes. Stewart highlights the controversies ignited by the powerful and eloquent prose of these and other writers with their expansive and often strongly political points of view. Combining a deeply felt sense of wonder at the beauty surrounding us with a rare ability to capture and explain the meaning of that beauty, nature writers have had a profound effect on American culture and politics. *A Natural History of Nature Writing* is an insightful examination of an important body of American literature. *To Save the Earth* Jules Archer, 2016-04-12 With today's climate change, our environmental problems aren't going away any time soon. *To Save the Earth* looks at the lives of four extraordinary Americans who fought to save our earth: John Muir, a pioneer of conservationism who was the founder of our national park system; Rachel Carson, biologist and author who educated our country about the effects of pesticides and chemical waste; David McTaggart, the organizer of Greenpeace who introduced nonviolent protest into the struggle; and Dave Foreman, cofounder and former leader of the activist group Earth First, who shook up a movement that had grown complacent. The biographies of each of these figures, as well as personal interviews with David McTaggart and Dave Foreman, help us to understand the environmental movement specific to the United States. With current issues of excessive pollution and climate change, this is an excellent resource for introducing young readers to the cause. Upon first publication, *To Save the Earth* was chosen as a Junior Library Guild Selection, and now this fascinating and important book is back in print to teach a whole new generation of readers the importance of environmental conservation and preservation.

JOHN MUIR Ultimate Collection: Travel Memoirs, Wilderness Essays, Environmental Studies & Letters (Illustrated) John Muir, 2024-01-09 In *JOHN MUIR Ultimate Collection: Travel Memoirs, Wilderness Essays, Environmental Studies, Letters (Illustrated)*, readers are invited into the rich landscapes of nature through Muir's eloquent prose. This comprehensive anthology presents a harmonious blend of travel memoirs, reflective essays, and passionate letters that encapsulate the spirit of the American wilderness. an intimate connection between humanity and nature while his environmental studies provide a prescient framework for understanding humanity's role within ecology. The contextual backdrop of the late 19th and early 20th centuries marked by burgeoning industrialization resonates with his urgent calls to conserve the natural world. John Muir (1838-1914), often referred to as the Father of the National Parks, dedicated his life to wilderness advocacy, and his experiences as a naturalist deeply informed his writings. A Scottish immigrant, Muir's transformative encounters with the wilds of North America fueled his passion for environmental stewardship. His establishment of the Sierra Club, along with his relentless campaigns for national parks, reflect a profound commitment to preserving the beauty he so eloquently articulated in his works. This ultimate collection is an essential read for anyone seeking inspiration from nature and a deeper understanding of environmental philosophy. Muir's timeless reflections resonate in our modern context, inviting readers to reconnect with the natural world and consider the significant role of conservation. Animal Perception and Literary Language Donald Wesling, 2018-12-26. *Animal Perception and Literary Language* shows that the perceptual content of reading and writing derives from our embodied minds. Donald Wesling considers how humans evolved from animals, have learned to code perception of movement into sentences and scenes. The book first specifies terms and questions in animal philosophy and surveys recent work on perception, then describes attributes of multispecies thinking and defines a tradition of writers in this lineage. Finally, the text concludes with literature coming into full focus in twelve case studies of varied readings. Overall, Wesling's book offers not a new method of literary criticism but a reveal of what we all do with perceptual content when we read.
