

WHAT IS SPACE?

Space is the vast void that extends beyond Earth, where planets, stars, galaxies, and other celestial bodies are found.

It is a place where astronomical and cosmic phenomena occur.

In space, there is no air or significant gravity, allowing for the free movement of objects.

Furthermore, **space** is an object of exploration for scientists and astronauts, as it provides valuable information about the universe and may reveal mysteries about our origin and our place in the cosmos.

Malcom, 2024-04-04 Reprint of the original first published in 1843 **The Celestial Key to the Vedas** B. G. Sidharth, 1999-10-01 A leading astronomer proves that India had a thriving civilization capable of sophisticated astronomy long before Greece Egypt or any other world culture Provides conclusive evidence that the Rig Veda is 12 000 years old Establishes actual dates and places for many of the events in the Hindu epics For more than a century scholars have debated the antiquity of the Vedas and their related literature the Brahmanas and Puranas Relying upon a host of assumptions from linguistic theory anthropology and archaeology they have agreed upon 1500 b c as the earliest possible date for the Rig Veda itself the oldest extant example of Indo European literature But in this groundbreaking book astronomer B G Sidharth proves conclusively that the earliest portions of the Rig Veda can be dated as far back as 10 000 b c By deciphering the astronomical events and alignments contained in mythical and symbolic form in these ancient texts Sidharth calls into question many if not all of the assumptions governing Indo European prehistory He explores such subjects as the astronomical significance of many Hindu deities and myths the system of lunar asterisms used to mark time the identity of the Asvins and the

sophisticated calendar of the ancients that harmonized solar and lunar cycles Sidharth provides incontrovertible evidence that such advanced astronomical concepts as precession heliocentrism and the eclipse cycle are encoded in these ancient texts passages of which make perfect sense only if these astronomical keys are known Based on internal evidence in the Mahabharata and Ramayana he also becomes the first to establish likely dates and even places for the events described in these famous epics The Celestial Key to the Vedas is sure to astonish anyone concerned with astronomy India or the roots of civilization
