Global Development Finance 2003:

Global Development Finance 2003, 2003-01-01 This publication is the World Bank's annual review of recent trends in and prospects for financial flows to developing countries. It also contains the Bank's projections of the global outlook in light of current global geopolitical uncertainties. It describes a fundamental shift that has occurred in the pattern of private sector financial flows to developing countries. Debt flows have fallen sharply while equity flows have remained comparatively robust. This shift from debt to equity should diminish the volatility of developing countries' external finance and improve their access to technology markets and management expertise. Recovery though has been weak due to broader geopolitical and financial market uncertainties.

Finance in the Global Economy T. Addison, G. Mavrotas, 2008-04-17 A positive chapter has begun in finance for poor countries. Yet progress remains tentative. This book looks at how to make international finance better serve the needs of poor countries and poor people. It contains contributions by economists and political scientists who have been at the centre of the international policy debate.

New Sources of Development Finance World Institute for Development Economics Research, 2005 As their Millennium Development Goals world leaders have pledged by 2015 to halve the number of people living in extreme poverty and hunger, to achieve universal primary education, to reduce child mortality, to halt the spread of HIV/AIDS and to halve the number of people without safe drinking water. Achieving these goals requires a large increase in the flow of financial resources to developing countries, double the present development assistance from abroad. Examining

innovative ways to secure these resources this book sets out a framework for the economic analysis of different sources of funding applying the tools of modern public economics to identify the key issues It examines the role of new sources of overseas aid considers the fiscal architecture and the lessons that can be learned from federal fiscal systems asks how far increased transfers impose a burden on donors and investigates how far one can separate raising resources from their use In turn the book examines global environmental taxes such as a carbon tax the taxation of currency transactions the Tobin tax a development focused allocation of Special Drawing Rights by the IMF the UK Government proposal for an International Finance Facility increased private donations for development purposes a global lottery or premium bond and increased remittances by emigrants In each case it considers the feasibility of the proposal and the resources that it can realistically raise In each case it offers new perspectives and insights into these new and controversial proposals **Global**

2006 World Bank,2006-01-01 International private capital flows to developing countries reached a record net level of 491 billion in 2005 This surge in private capital flows offers national and international policy makers a major opportunity to bolster development efforts if they can successfully meet three challenges The first is to ensure that more countries especially poorer ones enhance their access to developmentally beneficial international capital through improvements in their macroeconomic performance investment climate and use of aid The second is to avoid sudden capital flow reversals by redressing global imbalances through policies that recognize the growing interdependencies between developed and developing countries financial and exchange rate relations in the determination of global financial liquidity and asset price movements And the third is to ensure that development finance both official and private is managed judiciously to meet the development goals of recipient countries while promoting greater engagement with global financial markets These are the themes and concerns of this year s edition of Global Development Finance Vol I Analysis and Statistical Appendix reviews recent trends in financial flows to developing countries Vol II Summary and Country Tables includes comprehensive data for 138 countries as well as summary data for regions and income groups Economic Development E. Wayne

Nafziger,2012-03-26 E Wayne Nafziger analyzes the economic development of Asia Africa Latin America and East Central

Europe The book is suitable for those with a background in economics principles Nafziger explains the reasons for the recent fast growth of India Poland Brazil China and other Pacific Rim countries and the slow yet essential growth for a turnaround of sub Saharan Africa The fifth edition of the text written by a scholar of developing countries is replete with real world examples and up to date information Nafziger discusses poverty income inequality hunger unemployment the environment and carbon dioxide emissions and the widening gap between rich including middle income and poor countries Other new components include the rise and fall of models based on Russia Japan China Taiwan Korea and North America randomized experiments to assess aid an exploration of whether information technology and mobile phones can provide poor countries with a shortcut to prosperity and a discussion of how worldwide financial crises debt and trade and capital markets affect developing countries

South-south Migration and Remittances Dilip Ratha, William Shaw, 2007 South South Migration and Remittances reports on preliminary results from an ongoing effort to improve data on bilateral migration stocks It sets out some working hypotheses on the determinants and socioeconomic implications of South South migration Contrary to popular perception that migration is mostly a South North phenomenon South South migration is large Available data from national censuses suggest that nearly half of the migrants from developing countries reside in other developing countries Almost 80 percent of South South migration takes place between countries with contiguous borders Estimates of South South remittances range from 9 to 30 percent of developing countries remittance receipts in 2005 Although the impact of South South migration on the income of migrants and natives is smaller than for South North migration small increases in income can have substantial welfare implications for the poor The costs of South South remittances are even higher than those of North South remittances These findings suggest that policymakers should pay attention to the complex challenges that developing countries face not only as countries of origin but also as countries of destination

International Finance and Development Jose Antonio Ocampo, Jan Kregel, Stephany Griffith-Jones, 2007-04 This publication reviews the major financing issues influencing economic development since the historic Monterrey Consensus of the International Conference on Financing for Development in 2002 It contains four main chapters under the headings of international private capital flows official development financing external debt and systemic issues

The European Union and International Development Maurizio Carbone, 2007-12-12 The European Union is a leading actor in international development providing more than half of the world's foreign aid but also a unique case combining the characteristics of a bilateral and a multilateral donor Despite the general acknowledgment that policy coordination substantially improves both the effectiveness of foreign aid and the visibility of the EU in the international arena Member States have consistently resisted any intrusion into what they consider a key area of their national sovereignty The increases in volume of aid the ambitious agenda on aid effectiveness and the adoption of the European Consensus on Development indicate a change of direction Using development policy as a starting point this book provides a systematic analysis of the interaction between the European Commission and Member States It

explores the conditions in which the European Commission influences outcomes in the EU decision making process It ultimately argues that the European Commission plays a leadership role but this leadership is contingent upon the presence of an institutional entrepreneur its internal cohesiveness and the astute use of a repertoire of tactics Demonstrating that development policy may provide fresh insights into EU integration theory this book will be of interest to students and scholars of European Politics and International Development
