L'interprétation Des Textes Arguments:

L'interprétation des traités d'après la Convention de Vienne sur le droit des traités, 1978-02-14 **The Law in Philosophical Perspectives** Luc J. Wintgens, 2013-04-17 In this age of collections that is ours many volumes of collections are published They contain contributions of several well known authors and their aim is to present a selective overview of a relevant field of study This book has the same purpose Its aim is to introduce students scholars and all those interested in current problems of legal theory and legal philosophy to the work of the leading scholars in this field The large number of publications both books and articles that have been produced over recent decades makes it quite difficult however for those who are making their first steps in this domain to find firm guidelines The book is new in its genre because of its method The choice was made not to reprint an example of contributors earlier basic articles or a part of one of their books This would only give a partial view of the rich texture of their work Rather the authors were asked to make an original synthesis of their own contributions to the field of legal theory and legal philosophy Brought together in this volume they constitute a truly author ised view of their work This book is also new in that each essay is complemented with bibliographical information in order to encourage further research on the author s self selected work This will help the reader rapidly to become familiar with the whole of the published work of the contributors **Argumentation in Actual Practice** Frans H. van Eemeren, Bart Garssen, 2019-09-23 Argumentation in Actual Practice contains a collection of topical studies about argumentative discourse in context written by argumentation scholars from a diversity of academic backgrounds Some contributions provide general perspectives other contributions deal with specific issues particular types of argumentative discourse or individual argumentative speech events The contexts in which argumentation is examined vary from politics and the media to medical juridical educational commercial or military contexts a specific academic discipline a special issue or pertain to all kinds of contextualised argumentative discourse The issues discussed include the interpretation and analysis of argumentation strategic manoeuvring argument schemes the stock issues the fallacies the principle of charity and the persuasiveness of argumentative discourse A common feature is that they are all empirically oriented and that virtually all of them are strongly concerned with an adequate understanding of contextualised argumentative discourse and the factors that may increase or decrease its reasonableness and effectiveness **Reasonableness and interpretation**, 2003 The 2002 issue of the Yearbook concerns the notion of reasonableness in philosophical legal and economic domains After going back over the main definition of the concept of reasonable in greek philosophy the analysis carried out in this volume deals with the role played by the notion of reasonableness in practical philosophy and namely according to hermeneutical view of it With regard to legal field the notion of reasonableness is a core notion in constitutional law and it assumes specific meanings in private criminal international and administrative law Reasonableness turns out to be crucial with regard to many topics such as interpretation of rights balancing of fundamental rights and interpretation of standards **Texte und Untersuchungen**
