The Oxford Handbook of Reading Alexander Pollatsek, Rebecca Treiman, 2015 Writing is one of humankind's greatest inventions and modern societies could not function if their citizens could not read and write How do skilled readers pick up meaning from markings on a page so quickly and how do children learn to do so The chapters in the Oxford Handbook of Reading synthesize research on these topics from fields ranging from vision science to cognitive psychology and education focusing on how studies using a cognitive approach can shed light on how the reading process works To set the stage the opening chapters present information about writing systems and methods of studying reading including those that examine speeded responses to individual words as well as those that use eye movement technology to determine how sentences and short passages of text are processed The following section discusses the identification of single words by skilled readers as well as insights from studies of adults with reading disabilities due to brain damage Another section considers how skilled readers read a text silently addressing such issues as the role of sound in silent reading and how readers' eyes move through texts Detailed quantitative models of the reading process are proposed throughout The final sections deal with how children learn to read and spell and how they should be taught to do so These chapters review research with learners of different languages and those who speak different dialects of a language discuss children who develop typically as well as those who exhibit specific disabilities in reading and address questions about how reading should be taught with populations ranging from preschoolers to adolescents and how research findings have influenced education The Oxford Handbook of Reading will benefit researchers and graduate students in the fields of cognitive psychology developmental psychology education and related fields e.g. speech and language pathology who are interested in reading reading instruction or reading disorders

Reconceptualizing Literacy in the New Age of Multiculturalism and Pluralism Patricia Ruggiano Schmidt, Peter B. Mosenthal, 2001-07-01

This book offers a array of essays with challenging ideas and provoking new analyses of power asymmetries multiple epistemologies and vital concerns for the education of a different America the America of new immigrants people of color with other cultures languages and values The new American that many want to ignore and is becoming the only America This book also forces us to reflect on the educational challenges we must face especially in teacher education and the preparation of intellectual leaders None of the major agenda items associated with a new era of social justice can be either comprehended or accomplished without a profound understanding of multicultural literacy and of its relationship to ethnic racial cultural and linguistic diversity While in previous decades we used frequently a rhetoric of multiculturalism at a safe distance today we are living multiculturalism and practicing ethnic cultural and racial diversity in our daily lives as we seek a marriage partner a business associate a friend a church Most of all we must live multiculturalism as we go to school and see children's faces There is no way to escape the reality of ethnic racial and linguistic diversity as it comes entangled with many other cultural and class differences between and within each group we encounter Suddenly an abrupt awakening for many mainstream educators what was peculiar of some areas in the Southwest has become common scenario in most metropolises and large cities The present volume brings us face to face with issues and challenges we can no longer sweep under the rug This outstanding volume lays down a solid general conceptual foundation that permits us to link our theoretical past with the post modern era It also provides a clear context for the discussion of contrasting notions of monocultural literacy and the relationship of literacy and power The volume goes on to deal with the relationship of literacy and culture actually to specific cultures especially African American At this point the discourse turns to strategies for incorporating minority perspectives into the literacy curriculum and including the home cultures of disenfranchised peoples The last section of the book offers help on the practical issues of teacher education for student populations often ignored and linkages between schools and homes in order to empower the disenfranchised and isolated

Writing and the Origins of Greek Literature Barry B. Powell, 2007-04-16 Professor Powell ties the origin and nature of archaic Greek literature to the special technology of Greek alphabetic writing In building his model he presents chapters on specialized topics text orality myth literacy tradition and memorization and then shows how such special topics relate to larger issues of cultural transmission from East to West Several chapters are devoted to the theory and history of writing its definition and general nature as well as such individual developments as semasiography and logosyllabography Chinese writing and the West Semitic family of syllabaries He shows how the Greek alphabet put an end to the multiliteralism of Eastern traditions of writing and how the recording of Homer and other early epic poetry cannot be separated from the alphabetic revolution Finally he explains how the creation of Greek alphabetic texts demoticized Greek myth and encouraged many free creations of new myths based on Eastern images

Literacy S. N. Colamery, 2000 Literacy is defined as the ability to read and write One would expect that as the world enters the 21st century of the Third Millennium we wouldn't even need to discuss such a topic But alas that is not the case Even in the United States the only so called superpower left standing at the moment the rate of illiteracy is astonishing Some cynics say that there is no cause for alarm since the rich elite class needs millions of workers for low paid jobs and the less educated the better Others say that the lack of literacy is the fault of the schools and that if we double the pay of the teachers they will somehow suddenly be interested in teaching Still others say that with television and VCRs everywhere who needs to read and write anyway In this book we have collected citations sorted and indexed them in a way which we hope will be useful for those seeking further information on this topic At the beginning we offer excerpts from some of the fundamental reports summarising the dismal situation
