Planetary Health Andy Haines, Howard Frumkin, 2021-07-22 We live in unprecedented times the Anthropocene defined by far reaching human impacts on the natural systems that underpin civilisation Planetary Health explores the many environmental changes that threaten to undermine progress in human health and explains how these changes affect health outcomes from pandemics to infectious diseases to mental health from chronic diseases to injuries It shows how people can adapt to those changes that are now unavoidable through actions that both improve health and safeguard the environment But humanity must do more than just adapt we need transformative changes across many sectors energy housing transport food and health care The book discusses specific policies technologies and interventions to achieve the change required and explains how these can be implemented It presents the evidence builds hope in our common future and aims to motivate action by everyone from the

general public to policymakers to health practitioners Ecohydrological Interfaces Stefan Krause,David M. Hannah,Nancy B. Grimm,2023-10-16 Ecohydrological Interfaces Comprehensive overview of the process dynamics and interactions governing ecohydrological interfaces Summarizing the interdisciplinary investigation of ecohydrological interface functioning Ecohydrological Interfaces advances the understanding of their dynamics across traditional subject boundaries It offers a detailed explanation of the underlying mechanisms and process interactions governing ecohydrological interface functioning from the micro scale to the ecosystem and regional scale The multidisciplinary team of authors integrates and synthesises the current understanding of process dynamics at different ecohydrological interfaces to develop a unifying concept of their ecosystem functions The work introduces novel experimental and model based methods for characterizing and quantifying ecohydrological interface processes taking account of innovative sensing and tracing technologies as well as microbial and molecular biology approaches Key questions addressed in the book include Which conditions stimulate the transformative nature of ecohydrological interfaces How are ecohydrological interfaces organized in space and time How does interface activity propagate from small to large scales How do ecohydrological interfaces react to environmental change and what is their role in processes of significant societal value As a research level text on the functionality and performance of ecohydrological interfaces Ecohydrological Interfaces is primarily aimed at academics and postgraduate researchers It is also appropriate for university libraries as further reading on a range of geographical environmental biological and engineering topics **The Future of the World's Climate** Ann Henderson-Sellers,Kendal McGuffie,2012-01-31 The study of climate today seems to be dominated by global warming but these predictions of climatic models must be placed in their geological paleo climatic and astronomical context to create a complete picture of the Earth s future climate The Future of the World s Climate presents that perspective with data and projections that have emerged from more technologically advanced and accurate climate modeling Publisher s website **Resilience, Development and Global Change** Katrina Brown,2015-12-14 Resilience is currently infusing policy debates and public discourses widely promoted as a normative goal in fields as diverse as the economy national security personal development and well being Resilience thinking provides a framework for understanding dynamics of complex inter connected social ecological and economic systems The book critically analyzes the multiple meanings and applications of resilience ideas in contemporary society and to suggests where how and why resilience might cause us to re think global change and development and how this new approach might be operationalized The book shows how current policy discourses on resilience promote business as usual rather than radical responses to change But it argues that resilience can help understand and respond to the challenges of the contemporary age These challenges are characterized by high uncertainty globalized and interconnected systems increasing disparities and limited choices Resilience thinking can overturn orthodox approaches to international development dominated by modernization aid dependency and a focus on economic growth and to global environmental change characterized by

technocratic approaches market environmentalism and commoditization of ecosystem services Resilience Development and Global Change presents a sophisticated theoretically informed synthesis of resilience thinking across disciplines It applies resilience ideas specifically to international development and relates resilience to core theories in development and shows how a radical resilience based approach to development might transform responses to climate change to the dilemmas of managing forests and ecosystems and to rural and urban poverty in the developing world The book provides fresh perspectives for scholars of international development environmental studies and geography and add new dimensions for those studying broader fields of ecology and society Global Sustainability & Human Prosperity Thomas Elmqvist, Sarah Cornell, Marcus C Öhman, Tim Daw, Fredrik Moberg, Albert Norström, Åsa Persson, Garry Peterson, Johan Rockström, Maria Schultz, Ellika Hermansson Török, Victor Galaz, Claudia Ituarte-Lima, 2014-05-15 The development of a Post 2015 agenda and Sustainable Development Goals SDGs provide a global window of opportunity to address both social needs and environmental challenges together This discussion paper by the Stockholm Resilience Centre looks into the links between human wellbeing and the biosphere and describes why and how these links should influence the formulation of the new SDGs It explores what we can learn from the MDGs and how existing international agreements can be reflected in the Post 2015 MDG process The paper also seeks to contribute to the elaboration of targets including process oriented targets and scalable indicators suitable for a rapidly changing world *International Encyclopedia of Geography, 15 Volume Set* Noel Castree, Michael F. Effective Conservation Science Peter Kareiva,Michelle Marvier,Brian Silliman,2017-10-06 This novel text assembles some of the most intriguing voices in modern conservation biology Collectively they highlight many of the most challenging questions being asked in conservation science today each of which will benefit from new experiments new data and new analyses The book s principal aim is to inspire readers to tackle these uncomfortable issues head on A second goal is to be reflective and consider how the field has reacted to challenges to orthodoxy and to what extent have or can these challenges advance conservation science Furthermore several chapters discuss how to guard against confirmation bias The overall goal is that this book will lead to greater conservation of ecosystems and biodiversity by harnessing the engine of constructive scientific scepticism in service of better results The

Lens of Ecological Law Carla Sbert, 2020-04-24 Containing an in depth study of the emerging theory and core of ecological law this book insightfully proposes a lens of ecological law through which the disparity between current laws and ecological law can be assessed The lens consists of three principles ecocentrism ecological primacy and ecological justice These principles are used within the book to explore and analyse the challenges and opportunities related to the transition to ecological law and to examine three key mining case studies **Unsustainable World** Peter N. Nemetz, 2022-02-27 Using a cross disciplinary science and economics based approach this book provides a sobering and comprehensive assessment of the multifaceted barriers to achieving sustainability at a global level Organized into three parts the book defines sustainability in part I and sets the context of the historical and current difficulties facing the world today In parts II and III it outlines the sustainability challenges faced in transportation manufacturing and agriculture and then in turn addresses the solutions conditional solutions and nonsolutions to these challenges These include electric and autonomous automobiles nuclear power renewable energy geoengineering and carbon capture and storage The author attempts to differentiate among those proposed solutions and discusses which are most promising and which are infeasible counterproductive and potentially a waste of time and money In each of the book s chapters the scientific evidence is presented in detail in keeping with the advice of the young Swedish climate activist Greta Thunberg to let the science speak for itself The author outlines why sustainability is unlikely to be achieved in several key areas of human endeavor and readers are challenged to weigh the scientific evidence for themselves Using an economic business based approach this book introduces students and general readers to the challenges of sustainability and the environmental difficulties facing humanity today **Environmental Footprints** Kai Fang, 2020-10-19 This book focuses on environmental footprints that have attracted considerable interest and discussion within academia policy makers and the public as a tool to assess anthropogenic effects on the environment It begins with an overview which provides a starting point for understanding the concept of environmental footprints On the basis of a thorough investigation into the theoretical and methodological aspects of selected environmental footprints that have been widely adopted a unified framework for structuring categorizing and integrating various footprint indicators is established Furthermore the book brings clarity to the relationship between footprint analysis and life cycle assessment and challenges the isolation of environmental footprints and planetary boundaries The findings provide novel insights into the development of environmental footprints for environmental impact assessment and environmental sustainability assessment

Ecological Law and the Planetary Crisis Geoffrey Garver, 2020-10-29 This book uses a transdisciplinary systems approach to examine how Earth s human caused ecological crisis arose and presents a new legal approach for overcoming it Ecological Law and the Planetary Crisis first examines how the history of humanity s social metabolism along with the history of human inventions and ideas led to the human Earth dilemma we see today and explains why contemporary law is inadequate for confronting this dilemma The book goes on to propose ecological law law that maintains human activity within ecological

limits such as planetary boundaries while ensuring social justice and equity as an essential element of an urgently needed radical pathway of change toward a perpetual mutually enhancing human Earth relationship Finally it offers a systems based analytical tool for organizing actions to promote the transition from environmental to ecological law Increasing the visibility clarity and development of ecological law this book will be of great interest to students and scholars of ecological and environmental law and governance Provisional Cities Renata Tysczuk,2017-11-02 This book considers the provisional nature of cities in relation to the Anthropocene the proposed geological epoch of human induced changes to the Earth system It charts an environmental history of curfews admonitions and alarms about dwelling on Earth Provisional cities are explored as exemplary sites for thinking about living in this unsettled time Each chapter focuses on cities settlements or proxy urbanisations including past disaster zones remote outposts in the present and future urban fossils The book explores the dynamic changing and contradictory relationship between architecture and the global environmental crisis and looks at how to re position architectural and urban practice in relation to wider intellectual environmental political and cultural shifts The book argues that these rounder and richer accounts can better equip humanity to think through questions of vulnerability responsibility and opportunity that are presented by immense processes of planetary change These are cautionary tales for the Anthropocene Central to this project is the proposition that living with uncertainty requires that architecture is reframed as a provisional practice This book would be beneficial to students and academics working in architecture geography planning and environmental humanities as well as professionals working to shape the future of cities
