Global Connections International Telecommunications Infrastructure And Policy:

Global Connections Heather E. Hudson,1997 A comprehensive guide to international telecommunications explaining complex technical standards government regulations and enforcement practices that vary by country or by region Hudson clarifies standards and practices relating to voice and data transmissions and addresses the difficult process of privatizing government run and or broadcast networks **Linking Industries Across the World** Eike W. Schamp,2019-06-04

Originally published in 2005 This book examines how regional industries use different networks on various geographical scales in order to withstand increasing competition in a globalising world It argues that new forms of global governance of networked industries are emerging in particular in those areas that have only recently been incorporated into the global economy such as Eastern Europe Asia and Southern Africa The book addresses a number of issues including the different forms of institutional arrangements that contribute to the formation of heterogeneous global industrial networks It also raises the issue of national institutions that still matter in network formation The focus of the book is on how to improve regional and sectoral competitiveness in a global context and it suggests this is best achieved by a close analysis of global linkages an evolutionary perspective on processes taking place and a more differentiated view on globalisation

Communication Yearbook 25 William B. Gudykunst,2001-05 This volume offers state of the art communication research representing media interpersonal intercultural and other areas of communication It is an important reference on current research for scholars and students in the social sciences Governing Global Electronic Networks William J. Drake,Ernest J. Wilson (III.),2008-12-05 In this volume experts analyze the global governance of electronic networks emphasizing international power dynamics and the concerns of nondominant actors Each chapter concludes with a set of policy recommendations for the promotion of an open dynamic and more equitable network order *Industry Structure and Pricing* Mark A. Jamison,2013-03-09 Industry Structure and Pricing The New Rivalry in Infrastructure extends current economic models by incorporating effects of actual and potential rivalry in markets outside the markets of immediate interest Focusing on the contestable model the author shows how diverse patterns of actual and potential rivalry called multilateral rivalry or MLR affect the appropriateness of many regulatory policies It is specifically shown that many conclusions of the contestability literature are overly generous to firms that might want to protect or extend their monopoly positions While this book s refinement to existing economic theory gives strong results it is still based on static production functions and demands integrated to provide a dynamic view of multilateral rivalry Digital Formations Robert Latham,Saskia Sassen,2009-09-19 Computer centered networks and technologies are reshaping social relations and constituting new social domains on a global scale from virtually borderless electronic markets and Internet based large scale conversations to worldwide open source software development communities transnational corporate production systems and the global knowledge arenas associated with NGO networks This book explores how such digital formations emerge from the ever

changing intersection of computer centered technologies and the broad range of social contexts that underlie much of what happens in cyberspace While viewing technologies fundamentally in social rather than technical terms Digital Formations nonetheless emphasizes the importance of recognizing the specific technical capacities of digital technologies Importantly it identifies digital formations as a new area of study in the social sciences and in thinking about globalization The ten chapters by leading scholars examine key social political and economic developments associated with these new configurations of organization space and interaction They address the operation of digital formations and their implications for the development of longstanding institutions and for their wider contexts and fields and they consider the political economic and other forces shaping those formations and how the formations in turn are shaping such forces Following a conceptual introduction by the editors are chapters by Hayward Alker Jonathan Bach and David Stark Lars Erik Cederman and Peter A Kraus Dieter Ernst D Linda Garcia Doug Guthrie Robert Latham Warren Sack Saskia Sassen and Steven Weber Global Communication Thomas L. McPhail, 2009-02-09 The second edition of this major textbook in global communication has been fully revised to bring it up to date with advances in this dynamic field From media coverage of the Afghanistan and Iraq wars and Arabic media systems to digital cameras and the birth of the iPod this book offers students a comprehensive understanding of the complex international communication scene and of the implications of rapid changes to the worldwide media landscape that continue on a daily basis An accessible textbook which discusses the major trends stakeholders global activities and worldwide influences involved in international communications Utilizes numerous and diverse examples of media stakeholders including CNN Time Warner Disney the BBC and the advertising and music industries Features engaging examples from the war on terrorism Afghanistan and Iraq wars post 9 11 and al Jazeera through to the growing phenomena of Internet blogging Updates important industry information on CNN MTV and the BBC including the problems with the upcoming renewal of the BBC's global mandate and Royal Charter Organized accessibly around two main theories that anchor the international communication debate electronic colonialism and world system theory Accompanied by a fully updated instructor's manual available at <http://www.blackwellpublishing.com/mcphail> **Beyond Sputnik and the Space Race** Hugh R. Slotten, 2022-02-08 A fascinating account of how the United States established the first global satellite communications system to project geopolitical leadership during the Cold War On July 20 1969 the world watched spellbound as NASA astronaut Neil Armstrong stepped off the Apollo 11 lunar module to walk on the moon NASA estimated that 20 percent of the planet's population nearly 650 million people watched the moon landing footage which was made possible by the first global satellite communications system the International Telecommunications Satellite Organization or Intelsat In **Beyond Sputnik and the Space Race** Hugh R Slotten analyzes the efforts of US officials especially during the Kennedy administration to establish this satellite communication system and open it to all countries of the world Locked in competition with the Soviet Union for both military superiority and international prestige President John F Kennedy

overturned the Eisenhower administration's policy of treating satellite communications as simply an extension of traditionally regulated telecommunications. Instead of allowing private communications companies to set up separate systems that would likely primarily serve major developed regions, the new administration decided to take the lead in establishing a single world system. Explaining how the East-West Cold War conflict became increasingly influenced by North-South tensions during this period, Sloten highlights the growing importance of non-aligned countries in Asia, Latin America, and Africa. He also underscores the importance of a political economy of total Cold War in which many crucial aspects of US society became tied to imperatives of national security and geopolitical prestige. Drawing on detailed archival records to examine the full range of decisionmakers involved in the Intelsat system, *Beyond Sputnik and the Space Race* spotlights mid- and lower-level agency staff usually ignored by historians. One of the few works to analyze the establishment of a major global infrastructure project, this book provides an outstanding analytical overview of the history of global electronic communications from the mid-nineteenth century to the present.

Transnational Television Worldwide Jean K. Chalaby, 2004-11-26 This book is the first to offer a global perspective on the unique contemporary media phenomenon of transnational television channels. It is also the first to compare their impact in different regions of the globe. Revealing great richness and diversity across some of the world's main geocultural regions—Europe, the Middle East, Africa, South Asia, Greater China, and Latin America—international contributors with in-depth industry knowledge examine the place of these channels in the process of globalization, their impact on the nation-state and on regional culture and politics. The book also considers audiences and geocultural TV markets, providing new ways of thinking about the emerging transnational media order.

Beyond Broadband Access Richard D. Taylor, Amit M. Schejter, 2013-07-01 After broadband access, what next? What role do metrics play in understanding information societies? And more important, in shaping their policies? Beyond counting people with broadband access, how can economic and social metrics inform broadband policies, help evaluate their outcomes, and create useful models for achieving national goals? This timely volume not only examines the traditional questions about broadband, like availability and access, but also explores and evaluates new metrics more applicable to the evolving technologies of information access. *Beyond Broadband Access* brings together a stellar array of media policy scholars from a wide range of disciplines—economics, law, policy studies, computer science, information science, and communications studies. Importantly, it provides a well-rounded international perspective on theoretical approaches to database communications policymaking in the Americas, Europe, Asia, and Africa. Showcasing a diversity of approaches, this invaluable collection helps to meet myriad challenges to improving the foundations for communications policy development.

Tourism and Regional Development Maria Giaoutzi, 2017-05-15 Tourist visits used to be a less common activity in the past However more people than ever now make leisure trips making this an era of mass tourism This drastic change in spatial behaviour is not only caused by economic prosperity but the scale of this phenomenon means that it is able to generate economic growth making tourism a key factor in regional development policy One of the main challenges of current regional policy is to market the attractiveness of an area thereby increasing tourist visits and subsequent revenue In particular regions are attempting this through the use of Information and Communication Technologies ICT which offer information on interesting places and efficient methods for organizing and booking trips This book examines the interconnections between tourism ICT and regional development Bringing together a range of European case studies illustrating various ICT and policy innovations it not only critiques current activity by regions in terms of tourism development but also considers how this sector is likely to continue to grow

The Silicon Empire Michael B. Likosky, 2018-01-18 Michael Likosky examines the continuities and discontinuities between colonial and present day high tech transnational legal orders His concern is specifically with the colonial characteristics of the legal order which underpins the global high tech economy He distinguishes the democratic and human rights rhetoric of this economy from a reality wherein the legal order is often used to reproduce colonial type relationships Just as in the colonial period the expansion of trans border commerce overlaps with democratic demands and human rights in complex multifaceted and paradoxical ways Through a case study looking at Malaysia's Multimedia Super Corridor a high tech national development plan and foreign direct investment scheme he examines how the transnational leaders of the high tech economy along with the Malaysian political elite react when human rights problems threaten to derail commercial plans
