Future Currents In Aqueduct Studies Collected Classical Papers 2:

Histories of Peirene Betsey Ann Robinson, 2011 The Peirene Fountain as described by its first excavator Rufus B Richardson is the most famous fountain of Greece Here is a retrospective of a wellspring of Western civilization distinguished by its long history service to a great ancient city and early identification as the site where Pegasus landed and was tamed by the hero Bellerophon Spanning three millennia and touching a fourth Peirene developed from a nameless spring to a renowned source of inspiration from a busy landmark in Classical Corinth to a quiet churchyard and cemetery in the Byzantine era and finally from free flowing Ottoman fountains back to the streams of the source within a living ruin These histories of Peirene as a spring and as a fountain and of its watery imagery form a rich cultural narrative whose interrelations and meanings are best appreciated when studied together The author deftly describes the evolution of the Fountain of Peirene framed against the underlying landscape and its ancient medieval and modern settlement viewed from the perspective of Corinthian culture and spheres of interaction Published with the assistance of the Getty Foundation Winner of the 2011 Prose Award for Professional and Scholarly Excellence in the category of Archaeology Anthropology The Prose Awards are given annually by the Professional and Scholarly Publishing division of the American Association of Publishers

The Invention of the Inspired Text John C. Poirier, 2021-01-28 John C Poirier examines the theopneustic nature of the Scripture as a response to the view that inspiration lies at the heart of most contemporary Christian theology In contrast to the traditional rendering of the Greek word theopneustos as God inspired in 2 Tim 3 16 Poirier argues that a close look at first and second century uses of theopneustos reveals that the traditional inspirationist understanding of the term did not arise until the time of Origen in the early third century CE and that in every pre Origen use of theopneustos the word instead means life giving Poirier thus conducts a detailed investigation of theopneustos as it appears in the fifth Sibylline Oracle the Testament of Abraham Vettius Valens Pseudo Plutarch Placita Philosophorum and Pseudo Phocylides all of whom understand the word to mean life giving He also studies the use of the cognate term theopnous in Numenius the Corpus Hermeticum on an inscription at the Great Sphinx of Giza and on an inscription at a nymphaeum at Laodicea on the Lycus Poirier argues that a rendering of life giving also fits better within the context of 2 Tim 3 16 and that this meaning survived late enough to figure in a fifth century work by Nonnus of Panopolis He further traces the pre Origen use of theopneustos among the Church Fathers Poirier concludes by addressing the implication of rethinking the traditional understanding of Scripture stressing that the lack of God inspired scripture ultimately does not affect the truth status of the gospel as preached by the apostles

The Power of Urban Water Nicola Chiarenza, Annette Haug, Ulrich Müller, 2020-05-05 Water is a global resource for

modern societies and water was a global resource for pre modern societies The many different water systems serving processes of urbanisation and urban life in ancient times and the Middle Ages have hardly been researched until now The numerous contributions to this volume pose questions such as what the basic cultural significance of water was the power of water in the town and for the town from different points of view Symbolic aesthetic and cult aspects are taken up as is the role of water in politics society and economy in daily life but also in processes of urban planning or in urban neighbourhoods Not least the dangers of polluted water or of flooding presented a challenge to urban society The contributions in this volume draw attention to the complex manifold relations between water and human beings This collection presents the results of an international conference in Kiel in 2018 It is directed towards both scholars in ancient and mediaeval studies and all those interested in the diversity of water systems in urban space in ancient and mediaeval times **The Plain of Phaistos**

Focusing attention on gravity fed water flow systems in medieval cities and monasteries *Water Technology in the Middle Ages: Cities, Monasteries and Waterworks* after the Roman Empire challenges the view that hydraulic engineering died with the Romans and remained moribund until the Renaissance Roberta Magnusson explores the systems technologies how they worked what uses the water served and also the social rifts that created struggles over access to this basic necessity Mindful of theoretical questions about what hastens technological change and how society and technology mutually influence one another the author supplies a thoughtful and instructive study Archeological historical and literary evidence vividly depicts those who designed constructed and used medieval water systems and demonstrates a shift from a public administrative to a private innovative framework one that argues for the importance of local initiatives The following chapters attempt to chart a course between the Scylla and Charybdis of technological and social determinism While writing them I have tried to strike a balance between the technical and human aspects of medieval hydraulic systems and to remember that beneath the welter of documents and diffusion patterns configurations and components ordinances and expenditures lie the perceptions the choices and often the plain hard work of individual men and women from the Preface **Contributions to the Study of**
