Barker, Simon Mills, 2004-03-18 Another title in GMM's highly successful QBase series this time focusing on the Primary FRCA Fellowship of the Royal College of Anaesthetists with sets of examination papers the candidate can use to revise and practice their MCQ technique As always the self learning experience is greatly enhanced by the free CD ROM containing the QBase examination software This powerful program allows the user to sit the pre set exams as printed in the book or to create their own exams using questions drawn from the total pool available on the CD ROM The program can either generate these exams randomly maintaining the same proportions of each subject as the pre set exams or the user can select any number of questions in any subject area to create their very own exam However the user chooses to set an exam they can then mark analyse and store each attempt and review and re sit the same exam at a later date comparing their scores with previous attempts When re sitting an exam the user can also choose to shuffle the question stems A E so that they cannot simply remember patterns of true and false answers A final unique aspect of the program is that it allows the user to select how confident they are of their answer and the program can then provide feedback on a user's guessing strategy Oxford Handbook of Anaesthesia Rachel Freedman, Lara Herbert, Aidan O'Donnell, Nicola Ross, 2022-01-13 Returning for its fifth edition the Oxford Handbook of Anaesthesia has been re energized by new editors and a specialist contributor team while still retaining its much loved clear and concise style Written for anaesthetists at all stages of their careers from trainees sitting exams through to experienced consultants as well as ODPs and nurses involved in theatre area work and pre assessment this comprehensive guide to the anaesthetic world is as indispensable as ever This new edition has been completely revised and brings you the most up to date guidance and information to keep pace with fast moving areas of
