Securing Africa Toyin Falola, Charles Thomas, 2013-10-30 Africa has been and currently is the site of numerous conflicts and crises Authors previously wrote of these as specifically African problems or the problems of Europeans in Africa but newer scholarship on other aspects of Africa has come to stress the interconnectness of Africa and the wider world Still it has often been limited to studies of isolated instances within African countries with little to no connection to greater patterns of international power and violence This volume explores the historical and present local and international dimensions of the myriad security crises in Africa from the role of international relations during liberation to multination efforts against piracy

The Long 1968 Daniel J. Sherman, Ruud van Dijk, Jasmine Alinder, A. Aneesh, 2013-07-16 Delving into a tumultuous year s impact on art culture and politics this book illuminates the often overlooked histories of 1968 *The Journal of American History* From the mid 1960s to the early 1970s revolutions in theory politics and cultural experimentation swept around the world These changes had as great a transformative impact on the right as on the left A touchstone for activists artists and theorists of all stripes the year 1968 has taken on new significance for the present moment which bears certain uncanny

resemblances to that time The Long 1968 explores the wide ranging impact of the year and its aftermath in politics theory the arts and international relations and its uses today **Why Parties Matter** John H. Aldrich, John D. Griffin, 2018-01-10 Since the founding of the American Republic the North and South have followed remarkably different paths of political development Among the factors that have led to their divergence throughout much of history are differences in the levels of competition among the political parties While the North has generally enjoyed a well defined two party system the South has tended to have only weakly developed political parties and at times no system of parties to speak of With **Why Parties Matter** John H Aldrich and John D Griffin make a compelling case that competition between political parties is an essential component of a democracy that is responsive to its citizens and thus able to address their concerns Tracing the history of the parties through four eras the Democratic Whig party era that preceded the Civil War the post Reconstruction period the Jim Crow era when competition between the parties virtually disappeared and the modern era Aldrich and Griffin show how and when competition emerged between the parties and the conditions under which it succeeded and failed In the modern era as party competition in the South has come to be widely regarded as matching that of the North the authors conclude by exploring the question of whether the South is poised to become a one party system once again with the Republican party now dominant The Hibernian Magazine, Or, Compendium of Entertaining Knowledge ,1774 **Tear Gas Epiphanies** Kirsty Robertson, 2019-06-07 Museums are frequently sites of struggle and negotiation They are key cultural institutions that occupy an oftentimes uncomfortable place at the crossroads of the arts culture various levels of government corporate ventures and the public Because of this museums are targeted by political action but can also provide support for contentious politics Though protests at museums are understudied they are far from anomalous **Tear Gas Epiphanies** traces the as yet untold story of political action at museums in Canada from the early twentieth century to the present The book looks at how museums do or do not archive protest ephemera examining a range of responses to actions taking place at their thresholds from active encouragement to belligerent dismissal Drawing together extensive primary source research and analysis Robertson questions widespread perceptions of museums strongly arguing for a reconsideration of their role in contemporary society that takes into account political conflict and protest as key ingredients in museum life The sheer number of protest actions Robertson uncovers is compelling **Ambitious and wide ranging Tear Gas Epiphanies** provides a thorough and conscientious survey of key points of intersection between museums and protest a valuable resource for university students and scholars as well as arts professionals working at and with museums Struggles Before Brown Jean Van Delinder, 2015-11-17 There were many little known challenges to racial segregation before the landmark Supreme Court decision in *Brown v Board of Education* 1954 The author's oral history interviews highlight civil rights protests seldom considered significant but that help us understand the beginnings of the civil rights struggle before it became a mass movement She brings to light many important but largely forgotten events such as the often overlooked 1950s Oklahoma sit

in protests that provided a model for the better known Greensboro North Carolina sit ins This book s significance lies in its challenge to perspectives that dominate scholarship on the civil rights movement The broader concepts illustrated including agency culture social structure and situations throughout this book open up substantially more of the complexity of the civil rights struggle This book employs a methodology for analyzing not just the civil rights movement but other social movements and indeed social change in general *AF Press Clips* ,1969-07 **The Saturday Review of Politics, Literature,**

Science and Art ,1904 The Crimean War and Irish society Paul Huddie,2015-12-17 This book is a home front study of Ireland during the Crimean War which analyses how the various strands of Irish society responded to the conflict s events issues and impacts and how they memorialised it as part of the British Empire **The Political Thought of the Irish Revolution** Richard Bourke,Niamh Gallagher,2022-05-05 The Irish Revolution was a pivotal moment of transition for Ireland the United Kingdom and British Empire A constitutional crisis that crystallised in 1912 electrified opinion in Ireland whilst dividing politics at Westminster Instead of settling these differences the advent of the First World War led to the emergence of new antagonisms Republican insurrection was followed by a struggle for independence along with the partition of the island This volume assembles some of the key contributions to the intellectual debates that took place in the midst of these changes and displays the vital ideas developed by the men and women who made the Irish Revolution as well as those who opposed it Through these fundamental texts we see Irish experiences in comparative European and international contexts and how the revolution challenged the durability of Britain as a global power History of Nairnshire George Bain,1893

The Irish amateur military tradition in the British Army, 1854-1992 William Butler,2016-10-30 Covering the period from the re establishment of the Irish militia during the Crimean War until the disbandment of the Ulster Defence Regiment in 1992 this book examines the Irish amateur military tradition within the British Army distinctive from a British amateur military tradition Irish men and women of both religions and political persuasions made a significant contribution to these forces and in so doing played an important role within the British Empire whilst also providing a crucial link between the army and Irish society Utilising new source material this book demonstrates the complex nature of Irish involvement with British institutions and its Empire It argues that within this unique tradition two divergent Protestant and Catholic traditions emerged and membership of these organisations was used as a means of social mobility for political patronage and crucially to demonstrate loyalty to Britain and its Empire
