Allan,2006 This eBook bibliography on the history of the personal computer and the industry contains over 280 book notations and over 250 periodical notations It also contains a reprint of an article by the author entitled What Was the First Personal Computer *Birth of Modern Facts* James W. Cortada,2023-01-09 For over twenty years James W Cortada has pioneered research into how information shapes society In this book he tells the story of how information evolved since the mid nineteenth century Cortada argues that information increased in quantity became more specialized by discipline e g mathematics science political science and more organized Information increased in volume due to a series of innovations such as the electrification of communications and the development of computers but also due to the organization of facts and knowledge by discipline making it easier to manage and access He looks at what major disciplines have done to shape the nature of modern information devoting chapters to the most obvious ones Cortada argues that understanding how some features of information evolved is useful for those who work in subjects that deal with their very construct and application such as computer scientists and those exploring social media and most recently history The

Birth of Modern Facts builds on Cortada's prior books examining how information became a central feature of modern society most notably as a sequel to *All the Facts A History of Information in the United States since 1870* OUP 2016 and *Building Blocks of Society History Information Ecosystems and Infrastructures* R L 2021 **History Of Science In The U.S.** Clark A. Elliott, 2021-11-18 First published in 1996 The intention of this volume is two fold first to give a chronologically arranged overview of selected data on the history of science in the United States and second to orient the reader to the substantial reference literature and research sources as guidance to further study of the topic The subject areas that are covered include astronomy biology chemistry geology mathematics physics and their related disciplines areas such as anthropology and psychology are covered to a lesser extent Science is the central focus but the content of the work recognizes that the boundaries between subjects or activities are not absolute and certainly not when coverage spans several centuries **Book Review Digest** ,1912
