A History of Organizational Change Hans Erik Næss, 2020-07-13 This book is the first independent exploration of the Fédération Internationale de l'Automobile's FIA institutional history Virtually unexamined compared with similar institutions like the FIFA and the IOC the FIA has

nevertheless changed from being a small association in 1904 to becoming one of the world's most influential sport governing bodies. Through chronologically organised chapters this book explains how the FIA manages to link together motorsport circuses like Formula 1 with the automotive industry and societal issues like road safety and environmental sustainability. In an exciting narrative spanning seven decades it reviews the FIA's organisational turning points governing controversies, political dramas and sporting tragedies. Considering the FIA to be a unique type of hybrid organisation characterised by what the author calls organisational emulsion, this case study contains theoretical innovations relevant to other studies of sport governing bodies. It makes an empirically grounded contribution to the research fields of institutional logics, historical sociology and sport governance.

Words Made Flesh Sean Dempsey, 2022-08-26 Religion is not merely a different way of thinking but is rather an alternative manner of being; it is both a way of attending to the world and a form of embodiment. Literature provides another key to legislating new ways of being in the world. Some of the best Romantic literature can be understood as experimental attempts to access and harness infrasensible energy affects and dispositions operating beneath the threshold of consciousness in the hope that by so doing it may become possible to project elusive affects into the practical world of conscious thinking and judgment. *Words Made Flesh* demonstrates how the Romantic poets Samuel Taylor Coleridge, John Keats and Percy Bysshe Shelley and the novelist Jane Austen affect, mediate and ultimately alter our very sense of embodiment in ways that have lasting effects on readers' affective, political and spiritual lives. Such works, which unsettle habitual ways of seeing, are perennially valuable because they not only call attention to the dispositions we normally inhabit but they also suggest ways of forging new patterns and forms of life through the medium of embodiment. Drawing on the work of these writers, Dempsey argues that Romanticism's contribution to our understanding of the postsecular becomes clearer when considered in relation to three timely scholarly conversations not previously synthesized: secular and postsecular studies, affect theory and media studies. By weaving together these three strands, *Words Made Flesh* clarifies how Romanticism provides a useful field guide to the new geography of the self ushered in by secular modernity while also pointing toward potential postsecular futures. Ultimately, Dempsey argues for a view of literature that recognizes it as an essential component to ethical practice.
