FORTRAN for Beginners Christopher Lampton, 1984-01-01 An introduction to FORTRAN the first major computer language including a language sampler and step by step instruction for programming Introduction to Programming with Fortran Ian Chivers, Jane Sleightholme, 2012-02-08 This edition has been revised to stress the use of modern Fortran throughout Key features lots of clear simple and complete examples highlighting the core language features of modern Fortran including data typing array processing control structures functions subroutines user defined types and pointers pinpoints common problems that occur when programming has sample output from a variety of compilers expands on the first edition by introducing modules as soon as the fundamental language features have been covered Modules are the major organisational feature of Fortran and are the equivalent of classes in other languages major new features covered in this edition include introduction to object oriented programming in Fortran introduction to parallel programming in Fortran using MPI OpenMP and Coarray Fortran this edition has three target audiences the complete beginner existing Fortran programmers wishing to update their code those with programming experience in other languages Ian Chivers and Jane Sleightholme are the joint owners of comp fortran 90 which is a lively forum for the exchange of technical details of the Fortran language Ian is the editor of the ACM Fortran Forum and both Jane and Ian have both been involved in the Fortran standardisation process The authors have been teaching and supporting Fortran and related areas for over 30 years and their latest book reflects the lessons that have been learnt from this Fortran for Beginners Royston Albert Court, 1972

Introduction to Modern Fortran for the Earth System Sciences Dragos B. Chirila, Gerrit Lohmann, 2014-11-27 This work provides a short getting started guide to Fortran 90 95 The main target audience consists of newcomers to the field of numerical computation within Earth system sciences students researchers or scientific programmers Furthermore readers accustomed to other programming languages may also benefit from this work by discovering how some programming techniques they are familiar with map to Fortran 95 The main goal is to enable readers to quickly start using Fortran 95 for writing useful programs It also introduces a gradual discussion of Input Output facilities relevant for Earth system sciences from the simplest ones to the more advanced netCDF library which has become a de facto standard for handling the massive datasets used within Earth system sciences While related works already treat these disciplines separately each often providing much more information than needed by the beginning practitioner the reader finds in this book a shorter guide which links them Compared to other books this work provides a much more compact view of the language while also placing the language elements in a more applied setting by providing examples related to numerical computing and more advanced Input Output facilities for Earth system sciences Naturally the coverage of the programming language is relatively shallow since many details are skipped However many of these details can be learned gradually by the practitioner after getting an overview and some practice with the language through this book **Absolute Beginner's Guide to Programming** Greg
