Arguments for a Better World: Essays in Honor of Amartya Sen Kaushik Basu,Ravi Kanbur,2008-12-04 Amartya Sen has made deep and lasting contributions to the academic disciplines of economics philosophy and the social sciences more broadly He has engaged in policy dialogue and public debate advancing the cause of a human development focused policy agenda and a tolerant and democratic polity This argumentative Indian has made the case for the poorest of the poor and for plurality in cultural perspective It is not surprising that he has won the highest awards ranging from the Nobel Prize in Economics to the Bharat Ratna India s highest civilian honor This public recognition has gone hand in hand with the affection and admiration that Amartya s friends and students hold for him This volume of essays written in honor of his 75th birthday by his students and peers covers the range of contributions that Sen has made to knowledge They are written by some of the world s leading economists philosophers and social scientists and address topics such as ethics welfare economics poverty gender human development society and politics This first volume covers the topics of Ethics Normative Economics and Welfare Agency Aggregation and Social Choice Poverty Capabilities and Measurement and Identity Collective Action and Public Economics It is a fitting tribute to Sen s own contributions to the discourse on Ethics Welfare and Measurement Contributors include Sabina Alkire Paul Anand Sudhir Anand Kwame Anthony Appiah A B Atkinson Walter Bossert Francois Bourguignon John Broome Satya R Chakravarty Rajat Deb Bhaskar Dutta James E Foster Wulf Gaertner Indranil K Ghosh Peter Hammond Christopher Handy Christopher Harris Satish K Jain Isaac Levi Oliver Linton S R Osmani Prasanta K Pattanaik Edmund S Phelps Mozaffar Qizilbash Martin Ravallion Kevin Roberts Ingrid Robeyns Maurice Salles Cristina Santos T M Scanlon Arjun Sengupta Tae Kun Seo Anthony Shorrocks Ron Smith Joseph E Stiglitz S Subramanian Kotaro Suzumura Alain Trannoy Guanghua Wan John A Weymark and Yongsheng Xu Preference Change Till Grüne-Yanoff,Sven Ove Hansson,2009-06-11 Changing preferences is a phenomenon often invoked but rarely properly accounted for Throughout the history of the social sciences researchers have come against the possibility that their subjects preferences were affected by the phenomenon to be explained or by other factors not taken into account in the explanation Sporadically attempts have been

made to systematically investigate these influences but none of these seems to have had a lasting impact Today we are still not much further with respect to preference change than we were at the middle of the last century This anthology hopes to provide a new impulse for research into this important subject In particular we have chosen two routes to amplify this impulse First we stress the use of modelling techniques familiar from economics and decision theory Instead of constructing complex all encompassing theories of preference change the authors of this volume start with very simple formal accounts of some possible and hopefully plausible mechanism of preference change Eventually these models may find their way into larger empirically adequate theories but at this stage we think that the most important work lies in building structure Secondly we stress the importance of interdisciplinary exchange Only by drawing together experts from different fields can the complex empirical and theoretical issues in the modelling of preference change be adequately investigated

*Core Assumptions in Business Theory*, 2025-05-08 The modern market based economy generates wealth but it lags on well being it has mastered efficiency but struggles with equity it boasts size but falls short on sustainability In other words our economy delivers performance but neglects progress i e well being equity and sustainability Many rightly call for tighter regulation higher true prices and longer term incentives Others appeal to corporate purpose shared value and stakeholder centricity Beyond regulation and the practice of business we must attend as well to education and the theory of business In particular we must look at business theory's core assumptions whose weaknesses are long known In an applied field such as business where theory tends to be normative flawed assumptions could act as a wedge cleaving apart performance and progress In this volume Subramanian Rangan brings together eminent social scientists and philosophers to explore core assumptions in each of the major fields of business including economics strategy marketing operations decision science leadership governance technology and finance This structured field by field reflection reveals and expands the bounds of our rationality

*Core Assumptions in Business Theory* proposes a revised profit function that integrates harm outlines how economic actors may draw on moral philosophy to enact Pareto equity and not just Pareto efficiency suggests a two stage rationality approach that can attend to well being and recasts marketing as consumer education and not merely demand promotion With an emphasis on education rather than regulation of economic power this volume argues that moral reasoning and moral roles can fruitfully supplement prudential reasoning and functional responsibilities Such an evolution will enable our economy to be both modern and moral This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read on the Oxford Academic platform and offered as a free PDF download from OUP and selected open access locations
