A Primer on Securitization Leon T. Kendall, Michael J. Fishman, 2000 A Primer on Securitization introduces readers to America's newest system of raising capital what it is how it operates and what difference securitization makes Gathering fourteen lectures by the pioneers of securitization and by current practitioners from Freddie Mac Paine Webber JP Morgan Chrysler McKinsey Co and other major players A Primer on Securitization introduces readers to America's newest system of raising capital what it is how it operates and what difference securitization makes The securitization process bypasses financial intermediaries that have historically collected deposits and loaned them to those seeking funds and links borrowers directly to money and capital markets Although little has been written about what is perhaps one of the most important innovations to emerge in financial markets since the 1930s securitization has revolutionized the way that the borrowing needs of consumers and businesses are met Today for example over two thirds of all home loans are being securitized along with substantial percentages of auto loans and credit card receivables and the process continues to expand into new fields including synthetic securities Authoritative and practical these lectures show how securitization was developed to fill a gap in financial markets They discuss the nature and causes of the market imperfections that made securitization a valuable source of funds and describe how securitization has linked local
