LAN Technologies Explained Philip Miller, Michael Cummins, 2000 This volume aims to offer a comprehensive and easy to read tutorial It describes the protocols techniques products and concepts that enable an organization's computer and data networks to carry ever greater volumes of data at ever greater speeds This book guides readers from legacy access methods such as Ethernet and Token Ring through the high bandwidth technologies and concepts accessible to both new and experienced professionals

Inventing the Cloud Century Marcus Oppitz, Peter Tomsu, 2017-08-03 This book combines the three dimensions of technology society and economy to

explore the advent of today's cloud ecosystems as successors to older service ecosystems based on networks. Further, it describes the shifting of services to the cloud as a long-term trend that is still progressing rapidly. The book adopts a comprehensive perspective on the key success factors for the technology-compelling business models and ecosystems, including private, public, and national organizations. The authors explore the evolution of service ecosystems, describe the similarities and differences, and analyze the way they have created and changed industries. Lastly, based on the current status of cloud computing and related technologies like virtualization, the Internet of Things, fog computing, big data, and analytics, cognitive computing, and blockchain, the authors provide a revealing outlook on the possibilities of future technologies, the future of the Internet, and the potential impacts on business and society. *Proceedings, 1996 Fourth International Conference on Computer Communications and Networks (ICCCN '95), Las Vegas, Nevada, September 20-23, 1995* Kia Makki, Niki Pissinou, 1995. Proceedings of a September 1995 conference. Contents include 56 long papers and 32 short papers, each read by at least three reviewers before acceptance. Data and Computer Communications Gurdeep S. Hura, Mukesh Singhal, 2001-03-28. The protocols and standards for networking are numerous and complex. Multivendor internetworking, crucial to present-day users, requires a grasp of these protocols and standards. *Data and Computer Communications Networking and Internetworking*, a comprehensive text/reference, brings clarity to all of the complex issues involved in networking activity, providing excellent instruction for students and an indispensable reference for practitioners. This systematic work answers a vast array of questions about overall network architecture, design, protocols, and deployment issues. It offers a practical, thorough treatment of the applied concepts of data and computer communication systems, including signaling basics, transmission of digital signals, and layered architecture. The book features in-depth discussions of integrated digital networks, integrated services digital networks, and high-speed networks, including currently evolving technologies such as ATM switching and their applications in multimedia technology. It also presents the state of the art in Internet technology, its services, and implementations. The balance of old and new networking technologies presents an appealing set of topics for both undergraduate students and computer and networking professionals. This book presents all seven layers of OSI-based networks in great detail, covering services, functions, design issues, interfacing, and protocols. With its introduction to the basic concepts and practical aspects of the field, *Data and Computer Communications Networking and Internetworking* helps you keep up with the rapidly growing and dominating computer networking technology. *Planning and Architectural Design of Modern Command Control Communications and Information Systems* A. Nejat Ince, Cem Evrendilek, Dag Wilhelmsen, Fadi Gezer, 2012-12-06. The subject of this book is Command Control Communication and Information (3C I), which is the management infrastructure for any large or complex dynamic resource systems. Here, command means the determination of what to do, and control means the ongoing

management of the execution of a command 3 Decision making is the essence of C I which is accomplished through a phased implementation of a set of facilities communications personnel equipment and procedures for monitoring forecasting planning directing allocating resources and generating options to achieve specific and general objectives 3 The C I system that is in question here is for a strategic military command including its subordinate commands Although the design methodology that will be expounded in the book is for a military system it can to a large extent apply also to tactical military as well as to civilian management information systems MIS 3 A C I system is a decision making network that reflects a hierarchical organization 3 of C I nodes Each node is responsible for the management of some portion of the available resources where the higher level nodes are responsible for a correspondingly greater portion of the resources Within a C I system both command and control decision making occur at every level of the hierarchy Command decisions at one level determine how to satisfy the management decisions at a higher level
